

# YAAZ

Seeking  
beauty  
in  
simplicity.

ENJOY BEING OUTSIDE

# How beautiful!

## HOW BEAUTIFUL!

*"It is a phrase that arises while watching a sunset, a flowing stream, a child playing, or a burning fire."*

We know that beauty is an emanation of grace and harmony that goes beyond matter, beyond what we can touch with our hands and see with our eyes.

Yet what moves us is the desire to create beauty; to excite others; to have fun and bring joy and lightness into people's lives.

It is essential for us that objects have a positive emanation, that the hands are connected directly to the heart while they move to create new shapes.

We need quality and simplicity. We need to create atmospheres that are relaxing and welcoming at first glance.

The YAAZ outdoor elements are the result of a conscious choice that considers sustainability in every aspect.

The philosophy of owning fewer objects of higher quality is aimed at durability, and a form of self expression that lasts over time.

The brand name refers to summer, a time that brings brightness and defines the entire philosophy of the company.

The outdoor environment constantly modulates itself with the seasons. YAAZ interprets this perennial and circular movement through elements that harmoniously reflect nature and expand the possibilities of living outdoors.

It is nature, in its iridescent aspect, that inspires YAAZ and our aesthetic, functional, and ethical research throughout the year.

YAAZ

YAAZ employs the latest generation technologies for the production of its range of products. From the processing of aluminum to that of wood, everything including the materials is produced internally with very high-quality standards. The production plant is located in Adana in Turkey and covers an area of 47,000 m<sup>2</sup>, of which 26,000 m<sup>2</sup> is covered.

Simplicity is an indispensable value for us, it ethically guides us in every action we perform and brings with it a sense of naturalness and honesty.

# Nature teaches.

we  
handle  
production  
with  
care.

YAAZ carefully studies every detail of its products, from design to production, characterized by advanced technology using raw materials and machinery of the highest quality.

# The research work on materials is essential for YAAZ.

Quality is important in any environment, but in the outdoors, it becomes a substantial reason for existing in the market.

We use the best raw materials because we believe that it is the most ethical and sustainable attitude.

We then started to build from that foundation, through a selection of carefully calibrated finishings and color shades. This aspect is dedicated to the pursuit of beauty and the sensation of serenity that define our design research.

We are inspired by the colors of nature that relax and nourish our need for silence and light and are grounding and an infinite source of wellness.

Solid  
and durable,  
our products  
are born  
to bring  
something  
beautiful  
and  
harmonious  
to the world.

# UZ

angelettiruzza design

## Fresh and timeless simplicity.

Manufactured in original teak wood, UZ is a complete collection of outdoor furniture that considers modernity without forgetting the goodness of the past. Solid, with generous proportions, UZ generates a sense of intimacy and an immediate connection between the objects and the surrounding environment. The UZ design reflects the geometrical shape of a cylinder which is interpreted and modeled in height and in diameter to adapt itself to construction requirements. It is made more complex by a series of tapers, as seen on the armrests of the seats.

← UZ lounge chairs (**uz.12**) in dark teak with armrests rope in cod. 853 and HARR fire pit (**Harr.51**) in black aluminum.    ↑ UZ sofa (**uz.16**) in light teak with armrests rope in cod. 2000.

Seats and backrests are completed with soft cushions with removable covers that contribute to the general sensation of comfort and relaxation that interpret the entire company philosophy of living outdoors.

↑ UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 853, UZ sofa (**Uz.16**) light teak with armrests rope in cod. 1102 and HISS coffee table (**Hiss.32.r60**).

→ UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 2000, UZ sofa (**Uz.16**) light teak with armrests rope in cod. 2000, and HARR fire pit (**Harr.51**) in black aluminum.

Formal simplicity is a profound expression of quality. It means resolving complexity with synthesis, working simply, and creating a new identity. UZ is a collection with clean lines with great attention to the quality of materials used and attention to executive details.

The ropes penetrate the armrest of the lounge chair offering an immediate feeling of welcome.

With a strong visual impact, UZ is a collection of outdoor products with a classic soul, which brings to mind the atmosphere of exotic and sensual journeys of the past.

UZ is a collection of outdoor furniture that adapts to many different living needs. It can be easily inserted into small spaces such as balconies and can furnish larger domestic and public patios with style.

← UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 853.

↑ UZ lounge chairs (**Uz.12**) in light teak with armrests rope in cod. 581, and HISS coffee table (**Hiss.32.r110**). UZ chairs (**Uz.11**) light teak with armrests rope in cod. 853, UZ table 220 cm (**Uz.33.220**) in light teak.

The SUNBRELLA AMERICA fabrics which are beautiful, functional and resistant to atmospheric agents, weather conditions, dirt, mildew and mold are created by a globally supported team that undertakes to produce only the textile items with the most amazing performance you can buy.

← UZ is manufactured from precious teak wood from Myanmar, where there are the best ecological conditions to grow these exotic and precious plants which have characteristics of dimensional stability, hardness and water resistance, in fact they perfectly tolerate the temperature variations, humidity, salt and atmospheric agents.

The legs of the table can be closed, which facilitates the shipment of the product and adds value for those who intend to put away the table for the winter season.  
 The table is available in three sizes: 180x90 (70<sup>3</sup>/<sub>4</sub> x 35<sup>1</sup>/<sub>2</sub>inch), 220x100 (86<sup>3</sup>/<sub>4</sub>x 39<sup>1</sup>/<sub>2</sub>inch), 250x100(98<sup>3</sup>/<sub>4</sub>x 39<sup>1</sup>/<sub>2</sub>inch) cm and in a round shape of 140 (55 inch) cm in diameter.

↑ UZ chairs (**Uz.11**) in light teak with armrests rope in cod. 1102, UZ table 250 cm (**Uz.33.250**) in light teak. → UZ chairs (**Uz.11**) in light teak with armrests rope in cod. 2022.

The pure lines of the UZ collection define a timeless, essential, balanced, and, at the same time, serene and harmonious shape.

Structure is made of original teak wood, while YAAZ synthetic rope bands are used for outdoor applications. YAAZ rope is a yarn produced by the company that offers high protection against the sun and atmospheric agents. Internal paddings are made of FoamDry material. Sunbrella fabrics made of acrylic fibers are used for outdoor applications.

➔ EDI stackable chair can be made entirely of aluminum or with the backrest in original teak.

↑ EDI chair (**Edi.11**) in aluminum cement grey with light teak backrest and EDI chair (**Edi.11**) in aluminum copper brown.

➔ EDI chair (**Edi.11**) in aluminum copper brown and EDI chair (**Edi.11**) in aluminum cement grey with light teak backrest.

The stools are made entirely of aluminum. Comfortable, and light, they are suitable for any indoor and outdoor use in private homes and contracts.

↑ These two EDI stools (**Edi.15/ Edi.15.C**) made of aluminum are available in two heights.

The soft fittings define the purity of the shape that seems to welcome instantly. The cushions offer high comfort as well as extremely performing technical characteristics.

The backrest angle of the lounge is widely adjustable.

The UZ sunbed has a structure made entirely of original teak which makes it precious both from a material and functional point of view.  
The cot provides adjustment of the backrest, which, when raised, frees up a space with a container edge for storing towels, clothes, and personal items.

The clean and softly joined shapes are completed by a removable cushion and the internal padding is made of Foam Dry. The purity of a timeless, elegant, and refined design is added to the practicality and durability required of an outdoor furnishing accessory.

← UZ sunbed (**Uz.15**) with structure in original light teak and cushion made with YAAZ fabrics Aks sky.

The clean and softly joined shapes are completed by a removable cushion and the internal padding is made of Foam Dry. The purity of a timeless, elegant, and refined design is added to the practicality and durability required of an outdoor furnishing accessory.

# BARLA

angelettiruzza design

Generous  
welcome  
and a  
profound  
sense of  
wellness.

BARLA well interprets the philosophy of YAAZ which is based on the desire to generate a flowing continuity between the indoors and outdoors. The collection conveys the spaciousness and the energy of outdoor environments within a wide range of elements capable of evoking a sense of intimacy, comfort, and relaxation.

Living outdoors in the open air helps us to feel free and allows us to experience the sound and scent of the air.

The BARLA padded collection seems almost suspended, evoking contact with the sky, even though it is very low and close to the ground.

The shapes are sinuous because in nature nothing is rigid.

BARLA invites you to assume freer positions of the body and let yourself go softly, experimenting with new comfort zones.

Formal balance, harmony, grace, and simplicity are the qualities that inspired this collection.

↑ Two aluminum tubes, running always parallel to each other both in straight and in curved sections, define the wide and harmonious profile of the armchair. Among these, a rope weaving holds and hosts the wide cushions hinged to the structure.

Welcoming at first glance, the BARLA lounge chairs are characterized by softly connected lines that express a perfect formal balance between sinuosity and essentiality.

The playful and rounded shapes of the BARLA collection are ideal for dressing up in color and furnishing many different environments, from the more sober and elegant to the more effervescent and pop ones. You can play endlessly between the color combinations of the ropes, metal, and fabrics in the catalog, creating made-to-measure looks.

↑ BARLA sofa available in two dimensions (**Barla.16.265**) 265x100 (104 $\frac{1}{4}$ x 39 $\frac{1}{4}$ inch) and (**Barla.16.215**) 215x100 (84 $\frac{3}{4}$ x 39 $\frac{1}{4}$ inch).

➔ BARLA armchair with structure terra brown and rope cod. 14.

Structure in aluminum, YAAZ synthetic rope bands for outdoors, a yarn produced by the company with high protection to the sun and to the atmospheric agents. Sunbrella fabrics made of acrylic fibers for outdoor use.

↑ BARLA lounge chair (Barla.12) with structure dark beige and rope cod. 803

→ BARLA lounge chairs (Barla.12) with structure light beige and rope cod. 853. BARLA chairs (Barla.11) with structure light beige and rope cod. 803. HISS coffee table (Hiss.32.r110) structure black and porcelain green top.

The table follows an elongated profile that is composed in an oval shape. The aluminum structure is characterized by a round insert in Pavement, a composite material with a mottled appearance obtained by a mixture of fragments of marble, granite, basalt, and metal in a cement matrix, or HPL.

Comfortable, and enveloping, the BARLA chair is ideal for enjoying moments of conviviality in the open air because it combines design, comfort, and functionality.

← BARLA chair (**Barla.11**) with structure copper brown and rope cod. 156.

↑ BARLA chair (**Barla.11**) with structure oyster white and rope cod. 999.

↑ These two BARLA stools (**Barla.15.Bar / Barla.15.Counter**) made of aluminum and with rope backrest are available in two heights 97,5 cm (35<sup>1</sup>/<sub>4</sub>inch) and 88 cm (31<sup>3</sup>/<sub>4</sub>inch).

The footrest platform is supported by stainless steel against scratches and abrasion.

---

↑ BARLA collection lends itself to countless interpretations from the point of view of colors and finishes. In the monochromatic version, it appears sober and elegant but reveals an energetic and lively soul if you play with the contrast of colors and finishes.

The interpenetration of shapes on the BARLA table top arises from the observation of new behaviors and ways of use. It emphasizes the possibility of experiencing several functions at the same time such as working, eating, and playing.

# OVA

YAAZ lab + angelettiruzza design

## A lively and sartorial rhythm.

OVA is a modular seating system that furnishes the outdoor space of the home as a natural extension of the interior.

Comfort, beauty, and modularity combined with the solidity and quality of the materials used make OVA an outdoor collection that can be inserted into any public or private environment.

The art of overlapping different textures, different heights of backrests, and different materials transports indoor life outdoors and amplifies the concept of comfort. This creates an asymmetrical trend, a harmonious and non-conventional rhythm.

Personalization, flexibility, color, OVA is a modular seating system with a lively character. The structure is in aluminum and is characterized by the design of the backrests which changes with their height. The presence of the ropes, available in many different colors and textures, enhances the aesthetic and material qualities of the collection. The geometries are simple and original. The comfort and softness derive from the deep seat and the presence of many freely available cushions on the backrest.

↑ OVA sofa (**Ova.16.240**) in the 240 cm version, with light beige structure, back in aluminum and rope.

➔ Two modular OVA compositions. The first (left) consists of an ending element (**Ova.5**) and an end element (**Ova.1**). The second (right) composed of terminal element (**Ova.1**), an angular element (**Ova.4**), a middle element (**Ova.7**) and a terminal element (**Ova.5**).

YAAZ wants to offer its customers the possibility to express themselves in a personal way through chromatic choices and sartorial materials. OVA is an expression of this corporate philosophy and offers a very high degree of versatility, ranging from the use of ropes that create a rich material weave to the choice of mesh characterized by an exclusive YAAZ design or the bare purity of aluminum. The available elements can coexist together, creating an eclectic and original architecture, or more homogeneous choices can be made based on personal aesthetics and usage needs.

↑ OVA composition made up of two terminal elements, one with a rope backrest (**Ova.1**) and the other with aluminum backrest (**Ova.5**).

→ Three OVA modules. A terminal element with rope backrest (**Ova.1** also available with aluminum and metal mesh backrest), an angular element with aluminum backrest (**Ova.3** also available with rope backrest) and a terminal element with rope backrest (**Ova.6** also available with aluminum backrest).

OVA armchair (Ova.12) 85x98 h 74 cm (33½ x 38½ h 29¼ inch).

## Materials

### Aluminum

The aluminum of the structure for this collection is available in all the colors in the catalog.  
(see page 224)

### Fabric

The fabrics for this collection are available in all the colors in the catalog.  
(see page 230)

### Coffee table top

Available in pavement and HPL in all the colors in the catalog.  
(see page 225/236)

### Perforated sheet

Positioned in the backrest of the seats, available in two types: Lace and Sun Tech.  
(see page 228)

### Rope

Positioned in the backs of the seats and legs of the coffee table, available with two types of rope weaving. Each product has a rope dimension ( a. for coffee table legs and middle elements, b. for lounge chairs and sofa backs).  
The ropes for this collection are available in all the colors in the catalog.  
(see page 227)

# DENK

angelettiruzza design

## Think simply.

Made of precious teak wood, DENK presents itself as a seating line with generous volumes and large dimensions, composed of a chair, an armchair and a sofa. The essential form of the structure is enriched and embellished by the woven craftsmanship of the seatbacks which, particularly in the sofa, combine different elements: wood, fabric and ropes. Thanks to these characteristics and the comfortable armrests, it can simply and naturally be inserted in various architectural and housing contexts from the contract to the residential sector.

Structure is made of original teak wood, while YAAZ synthetic rope bands are used for outdoor applications. YAAZ rope is a yarn produced by the company that offers high protection against the sun and atmospheric agents.

↑ Structure is made of original teak wood, while YAAZ synthetic rope bands are used for outdoor applications. YAAZ rope is a yarn produced by the company that offers high protection against the sun and atmospheric agents. Internal paddings are made of FoamDry material.

# MONTE

angelettiruzza design

Many  
chairs  
in one.

The new MONTE chair has an ambitious vocation. Very comfortable yet extremely practical as it is stackable, it can be interpreted in many ways also thanks to the various weaving of the ropes on the seatback and to its colors that praise and pay tribute to nature: from forest green to midnight blue, from the brown of the earth to the ivory of the sand, up to rust color, rose and gray. The linear and aesthetically captivating design of the object is made more three dimensional precisely through these shades and gradations between the structure and the cushions, made possible thanks by numerous color variations.

↑ It is practical because it is stackable. It can be interpreted in many different ways thanks to the diversity in the seat back. It is made entirely of aluminum. The armrest is manufactured with die casting technique. The chair has 3 different back alternatives.

The simplest model is entirely made in aluminum whereas in the more luxurious version soft cushions are added which can also cover the seatback or even embrace it and adapts perfectly to the outdoor mood, to a slow and relaxed time. The sophisticated die-casting technique of the metal armrest once again confirms the brand's attention to details and its significant investment in R&D.

# TURTLE

YAAZ lab

The  
sweetness  
of a  
memory.

The TURTLE collection includes a rocking armchair, small lounge chair, chair, stool, table, bar table, coffee table, and daybed. The collection features a simple design that evokes the warmth and comfort of cherished memories, such as a cozy crib or a mother's embrace. The chair is constructed entirely from aluminum, making it durable enough to withstand extreme weather conditions.

The small lounge chair and rocking armchair come with generously padded cushions for added comfort and softness, which can be easily removed for cleaning.

↑ The TURTLE collection consists of three types of seating: chairs, lounge chairs, and rocking armchairs. The legs of the chairs and lounge chairs are available in either teak wood or aluminum.

The backrests of the chairs in the TURTLE collection are available in either aluminum or a combination of aluminum and woven ropes. This, along with the option to choose the material of the legs, makes the collection extremely versatile and suitable for furnishing any type of environment.

↑ TURTLE lounge chair (**Turtle.12**) with a dark beige structure, light teak legs and rope backrest with code. 156.

➔ TURTLE rocking armchair (**Turtle.13**) with a dark beige structure and rope backrest with code. 156.

Also ideal for contract use, the TURTLE table, which is available in three different sizes: 90x90cm (35<sup>3</sup>/<sub>4</sub>x 35<sup>3</sup>/<sub>4</sub> inch), 70x70 cm (27<sup>2</sup>/<sub>4</sub>x 27<sup>2</sup>/<sub>4</sub> inch) and 80 cm in diameter (Ø 31<sup>2</sup>/<sub>4</sub> inch).  
The table is made entirely of aluminum, making it light weight and durable. The legs are also removable to facilitate easier and more sustainable transport.

→ TURTLE square tables available in two sizes: **(Turtle.33.90)** 90x90 (35<sup>3</sup>/<sub>4</sub> x 35<sup>3</sup>/<sub>4</sub> inch) cm, **(Turtle.33.70)** 70x70 (27<sup>2</sup>/<sub>4</sub> x 27<sup>2</sup>/<sub>4</sub> inch) cm and TURTLE round table available in one size **(Turtle.33.r80)** 80 cm in diameter (Ø 31<sup>2</sup>/<sub>4</sub> inch).

**TURTLE DAYBED**  
It provides unique comfort with its round shape and aluminum frame that stands firmly on the ground.  
The backrests of the daybed in the TURTLE collection are available in either aluminum or a combination of aluminum and woven ropes.

# DEDIM

Michael Graves Studio

A seating family which draws inspiration from the image of director chairs.

The collection manifests a perfect balance between aesthetics, functionality and wellbeing: made from aluminium and fabric to guarantee lightness, it interprets a refined design concept which results in the triangular section of the legs, the armrests and the hand rests. The seat, composed of quilted and padded bands, presents a textured visual display, whereas the seat back is created by weaving technical fabrics of Serge Ferrari.

# SAYE

angelettiruzza design

Quality  
of materials,  
workmanship,  
and shape  
for  
a timeless  
chair.

SAYE is a contemporary reinterpretation of the classic folding director's chair. It is comfortable, solid, functional, and beautiful, with a structure made of die-cast aluminum. This material and technology ensure exceptional outdoor performance, such as lightness, resistance to the elements, and sturdiness. YAAZ offers its original interpretation of this space-saving product, which is a true status symbol with an illustrious and ancient history.

The functionality of saving space by making the chair foldable and therefore easily transportable and storable is brilliantly resolved by the die-cast aluminum which designs the opening and closing joint of the seat with great lightness.

↑ SAYE director chair (**Saye.11**) with a red brown structure, light teak armrests.

↗ One open SAYE foot stool (**Saye.14**) with a copper brown structure.

The functionality of saving space by making the chair foldable and therefore easily transportable and storable is brilliantly resolved by the die-cast aluminum which designs the opening and closing joint of the seat with great lightness.

↑ SAYE has original teak inserts on the armrests that make prolonged use comfortable. The fabric that makes up the seat and back has been designed in such a way that it is completely removable to facilitate cleaning and possible replacement.

# FESS

angelettiruzza design

Feel  
at home  
in the  
open air.

FESS, a circular tented gazebo, synthesis of a new concept of a convivial and communal setting.

Inspired by the shape of a weeping willow, FESS reinterprets the richly decorated ancient berceau, presenting itself as a circular tented gazebo which tells a new concept of a convivial and communal setting. Its light and strong aluminium frame is covered with woven ropes on the dome, which, as descending downwards, transforms it into a shelter of meditation for the hottest hours of the day or an outdoor dinner.

FESS is completely dismountable and is equipped with a central light point for inserting a lamp and a fan.

FESS has a diameter and height of 3,5 mt. A rope or teak carpet is provided for the internal floor. Inside it can be furnished at the customer's discretion with tables and chairs, armchairs and sofas, sun loungers etc..

# FESS technical sheet

gazebo

## Materials

### Aluminum

The aluminum of the structure for this collection is available in all the colors in the catalog.  
(see page 124)

### Perforated sheet

Positioned on one of the walls of the gazebo.  
(see page 228)

### Rope

Positioned on the dome of the structure and used for the rope curtain of the gazebo.

The ropes for this collection are available in all the colors in the catalog.  
(see page 228)

# ADA

angelettiruzza design

An  
island  
of well-being  
that  
reinterprets  
life  
outdoors.

ADA is a sofa with generous proportions that offers a 360 ° view. Like an island in the open sea, it offers different bends and views and invites new and relaxed ways of use.

It is an oasis, a flying carpet, a platform to be experienced based on the feeling of the moment. A place where you can rest, play with your children, work, have time to yourself, or share with others.

It offers the softness and embrace of the cocoon-effect cushions, but also the possibility of having more sustained support while you eat, meditate, sunbathe or simply chat.

Its soft shapes enhance the tactile and expressive qualities of the fabrics.

It is an immediately understandable product that fits with character into any type of environment, public or private.

ADA is a sofa designed to provide a 360° experience, furnishing both private and public outdoor spaces with naturalness and personality. It is a highly durable and sturdy piece of furniture, thanks to its advanced technology.

The designers, Silvana Angeletti and Daniele Ruzza, describe it as follows:

*"Have you ever experienced the feeling of suspension when you're in the middle of the sea, on a stationary boat, or on a small island? You let yourself go, with only the warming sun, the sound of the water, and the breeze caressing your skin... Well, we imagined this sofa as a 360-degree open-air living space, without a specific direction. A place to rest, work, or share moments with others, depending on the situation. It provides the softness of cocoon-effect cushions but also offers more sustained support for activities such as eating, meditating, or simply talking".*

← Two ADA sofas (**Ada.16**), two UZ round tables in dark teak (**Uz.33.r140**) and SAYE director chairs (**Saye.11**).

# ANKA

YAAZ lab

Comfort  
and  
relaxation  
for the  
outdoor  
living area.

ANKA is a sunbed that can be easily moved thanks to the large rear wheels. The shape is simple and functionality is guaranteed. It is made of aluminum which is a light weight and hard metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. It is also the most popular. Although it is extremely water resistant on its own, it is recommended to add color with polyester electrostatic powder coating.

# HAYAL

angelettiruzza design

the encounter  
between  
Turkish  
and Italian  
tradition  
and  
culture.

From the encounter between Turkish and Italian tradition and culture, the HAYAL collection of circular swings is born, whose strong scenic personality is expressed in the essentiality of the lines. The structure is made in solid aluminum and the seat is upholstered with fabric, whereas the small tassels embellish its ropes. This poetical decor which recalls childhood is born from the idea of creating a place non-place, of giving shape to a magical object like a flying carpet that helps you to immerse yourself into a dreamy and liberating dimension.

Structure in aluminum, YAAZ synthetic rope bands for outdoors, a yarn produced by the company with high protection to the sun and to the atmospheric agents. Sunbrella fabrics made of acrylic fibers for outdoor use.

## COMPLEMENTS

# SWEET

@violanellaiuola

## The imagination sees.

SWEET furnishing accessories are much more than a pillow and a blanket joined together.

They represent the care and love that YAAZ has towards its audience and the desire to offer them beauty at 360 degrees.

Designed by @violanellaiuola, a young Italian fashion designer, they are a concentration of beauty and functionality, a real work of art that captures the imagination for its explosive creativity.

What we find represented in SWEET is a fantastic world, where female creatures live in symbiosis with nature, there is no form of separation, and a harmonious and fluid understanding is celebrated.

SWEET is available in six different versions with variations in color and material. In five of these versions, the cushions are covered with SUNBRELLA fabrics on the outside, making them adaptable to all types of products and environments.

# HARR

YAAZ lab

## Outdoor fire pit with wood holder.

HARR is a garden fire pit with a dome, made of stainless steel.  
The grill cover can be made of pavement, stainless steel or Decorative High Pressure Laminate(HPL).  
The circular shape enhances the atavistic charm of fire, and its sacredness, and offers protection and shelter.

➔ The fire pit can be covered with a dome in stainless steel or with a panel in HPL, pavement or stainless steel.

# HISS

angelettiruzza design

Monolithic  
bases  
and  
material tops  
for HISS  
coffee tables.

The pure and basic line of the structure is made of matte black painted aluminum and houses the handmade porcelain mosaic top with a 6x5cm module (2¼x2inch).

Aside from its aesthetic, sensory, and chromatic features, porcelain offers great resistance to chemical, atmospheric, and physical agents. It is particularly suitable for outdoor spaces due to its compactness and impermeability.

← The HISS coffee table is available in several versions, including HISS coffee table (**Hiss.32.r100**) with a terra brown structure and dark red top. HISS coffee table (**Hiss.32.r37**) with a terra brown structure and brown top. HISS coffee table (**Hiss.32.r60**) with a terra brown structure and dark red top. HISS coffee table (**Hiss.32.r110**) with a terra brown structure and green top. HISS coffee table (**Hiss.32.r45**) with a terra brown structure and green top.

# SINI

materials and finishes

# ALUMINUM

most popular metal

Aluminum is a light weight and strong metal with an excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Although aluminum is the most popular material for outdoor furniture, despite being light weight, it is durable and can be easily processed into various complex shapes. While it is extremely weather-resistant on its own, it is recommended to be coated with polyester electrostatic powder for added protection against the elements and scratches, as well as to add color to the product. Since the electrostatic powder paint adheres better to the metal, it also makes the product much more resistant to fading. As with other metals, aluminum can warm up or cool down depending on weather conditions, so it is recommended to use it with a cushion for comfort.

# TEAK

handsome wood

Being in high demand as well as being available in limited availability, this durable and attractive wood is the most popular wood choice for outdoor furniture. Because teak has many features that make it ideal for outdoor use. It is extremely strong and does not easily bend, crack, or become brittle, unlike many other types of wood. This is because teak repels most water and does not expand or contract during the drying process. It has a high natural oil content that makes it highly resistant to rot and insect damage. This resistance to external factors allows teak wood can last for a long time, up to fifty years or more. The gorgeous honey brown look can be maintained with minimal oiling or treatment if left untreated, can turn into an attractive silver gray over time. It is relatively easy to maintain and can be cleaned with mild soap and water or teak-specific cleaners.

# MENT

the limitlessness of nature

High-strength terrazzo plates produced with the highest quality natural stones. "Placco terrazzo slabs", branded as Pavement, are produced by mixing marble, granite, basalt, metal chips, glass pieces, and different aggregates with cement paste. A first-class appearance is obtained with homogeneous color and aggregate distribution on large surfaces. Pavement plates provide wide possibilities for different designs in spaces with the resistance to color fading and unlimited color and a wide variety of dimensions, especially for outdoor use.

# YAAZ ROPE

colorful

We created a colorful collection with our YAAZ synthetic outdoor weaving yarns.

Thanks to the additives and special pigments used in production, sunole yarns with high protection against sun and weather conditions, high color fastness and high strength are the main parts of our YAAZ synthetic rope bands collection.

The color scale, which can be easily combined with our aluminum frame colors, has been specially selected and produced by our design team.

Rope accessories adopted in outdoor furniture in the world will gain a brand new atmosphere with YAAZ synthetic rope bands colors.

# PERFORATED SHEET

aesthetic effects

Durable Perforated Sheets Offer Stunning Aesthetic Effects. Meanwhile, various decorative hole patterns are available, such as triangular, diamond, hexagonal, four-point star, oblong, etc. Our custom patterns are carefully selected for our collection.

model suntech

# PORCELAIN

Among the different types of ceramics, porcelain is the most precious, by virtue of its particular compactness, resistance, impermeability, whiteness, and luster.

Porcelain is a water-repellent material, the water absorption of this material is zero, and extremely resistant to chemical and atmospheric agents and to compression and traction, which makes it particularly suitable for outdoor products.

# STRAPS COLOR

Focusing on subtle patterns that read as textures, Sunbrella Sling allows you to achieve an elevated indoor aesthetic in an outdoor setting. Unlike traditional PVC slings that are stiff and uncomfortable, Sunbrella Sling blends the strength of PVC with the softness of Sunbrella acrylic yarn for added comfort. By blending natural color palettes with novelty threads for added texture and luxury, Sunbrella Sling is ideal for crafting fully-upholstered furniture pieces for outdoor patios and other traditional sling applications.

# SUNBRELLA FABRICS

100% Sunbrella Acrylic

Outdoor fabrics made from acrylic fibers are strong. It is more resistant to both weather conditions and usage errors such as mold, friction and tearing. This is especially important for outdoor flooring in active residential and commercial applications.

Before weaving, acrylic fabric threads are dyed with the solution. This allows the fabric to retain its color longer, even when exposed to direct sunlight. In addition to its water repellency, acrylic fabrics are more breathable than other options and allow the fabric to stay cooler in hot weather. It is also easy to clean with soap and water. So; Acrylic fabrics are a multi-purpose textile product that should be preferred in outdoor furniture.

Sunbrella® acrylic fabrics are considered premium for outdoor textiles. Sunbrella® is long-lasting compared to its counterparts and therefore provides long-term savings. If you especially care about UV protection, the best choice would be Sunbrella® products.

# Z-PACT/HPL

decorative high pressure laminate

Superior features of ZERO PST surface technology;

- Non-finger printing surface
- Soft-touch ultra-matte finish
- Low light reflection due to ultra-color density
- Easy to clean
- Resistance to house hold and laboratory chemicals
- Anti-bacterial properties for safe food contact
- High heat resistance and temperature/cold resistance
- Long-lasting durability thanks to micro-scratch, impact and abrasion resistance, thermal healing repair, flame retardant, and water repellent properties
- ZERO-HPL, which is reinforced with pine or ganic polymer(lignin), has a stylish appearance and is extremely hard.
- Thanks to these superior properties, ZERO PST is ideal for outdoor applications.
- Lignin is a complex organic polymer that builds up in the cell walls of many plants, making them hard and woody.

# FOAM DRY

Open-cell Technology

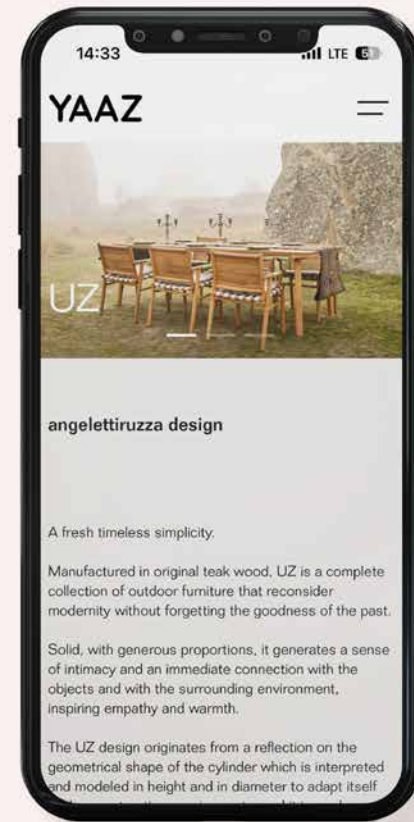

Foam Dry is an innovative open-cell technology that allows for quick and efficient moisture management. Its unique design promotes air flow and evaporation, which helps to prevent the growth of mold, mildew, and bacteria. FOAM DRY is ideal for a furniture cushions. Its breath able and moisture-wicking properties provide superior comfort and hygiene, making it a popular choice for consumers and manufacturers alike.
