

YAAZ

Seeking
beauty
in
simplicity.

How beautiful!

HOW BEAUTIFUL!

"It is a phrase that arises while watching a sunset, a flowing stream, a child playing, or a burning fire."

We know that beauty is an emanation of grace and harmony that goes beyond matter, beyond what we can touch with our hands and see with our eyes.

Yet what moves us is the desire to create beauty; to excite others; to have fun and bring joy and lightness into people's lives.

It is essential for us that objects have a positive emanation, that the hands are connected directly to the heart while they move to create new shapes.

We need quality and simplicity. We need to create atmospheres that are relaxing and welcoming at first glance.

The YAAZ outdoor elements are the result of a conscious choice that considers sustainability in every aspect.

The philosophy of owning fewer objects of higher quality is aimed at durability, and a form of self expression that lasts over time.

The brand name refers to summer, a time that brings brightness and defines the entire philosophy of the company.

The outdoor environment constantly modulates itself with the seasons. YAAZ interprets this perennial and circular movement through elements that harmoniously reflect nature and expand the possibilities of living outdoors.

It is nature, in its iridescent aspect, that inspires YAAZ and our aesthetic, functional, and ethical research throughout the year.

YAAZ

YAAZ employs the latest generation technologies for the production of its range of products. From the processing of aluminum to that of wood, everything including the materials is produced internally with very high-quality standards. The production plant is located in Adana in Türkiye and covers an area of 47,000 m², of which 26,000 m² is covered.

Simplicity is an indispensable value for us, it ethically guides us in every action we perform and brings with it a sense of naturalness and honesty.

Nature teaches.

we
handle
production
with
care.

YAAZ carefully studies every detail of its products, from design to production, characterized by advanced technology using raw materials and machinery of the highest quality.

The research work on materials is essential for YAAZ.

Quality is important in any environment, but in the outdoors, it becomes a substantial reason for existing in the market.

We use the best raw materials because we believe that it is the most ethical and sustainable attitude.

We then started to build from that foundation, through a selection of carefully calibrated finishings and color shades. This aspect is dedicated to the pursuit of beauty and the sensation of serenity that define our design research.

We are inspired by the colors of nature that relax and nourish our need for silence and light and are grounding and an infinite source of wellness.

Solid
and durable,
our products
are born
to bring
something
beautiful
and
harmonious
to the world.

UZ

angelettiruzza design

Fresh and timeless simplicity.

Manufactured in original teak wood, UZ is a complete collection of outdoor furniture that considers modernity without forgetting the goodness of the past. Solid, with generous proportions, UZ generates a sense of intimacy and an immediate connection between the objects and the surrounding environment. The UZ design reflects the geometrical shape of a cylinder which is interpreted and modeled in height and in diameter to adapt itself to construction requirements. It is made more complex by a series of tapers, as seen on the armrests of the seats.

← Uz lounge chairs (**Uz.12**) in dark teak with armrests rope in cod. 853 and HARR fire pit (**Harr.51**) in black aluminum. ↑ Uz sofa (**Uz.15**) in light teak with armrests rope in cod. 2000.

Seats and backrests are completed with soft cushions with removable covers that contribute to the general sensation of comfort and relaxation that interpret the entire company philosophy of living outdoors.

↑ UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 853, UZ sofa (**Uz.15**) light teak with armrests rope in cod. 1102 and HISS coffee table (**Hiss.32.r60**).

→ UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 2000, UZ sofa (**Uz.15**) light teak with armrests rope in cod. 2000, and HARR fire pit (**Harr.51**) in black aluminum.

Formal simplicity is a profound expression of quality. It means resolving complexity with synthesis, working simply, and creating a new identity. UZ is a collection with clean lines with great attention to the quality of materials used and attention to executive details.

The ropes penetrate the armrest of the lounge chair offering an immediate feeling of welcome.

With a strong visual impact, UZ is a collection of outdoor products with a classic soul, which brings to mind the atmosphere of exotic and sensual journeys of the past.

UZ is a collection of outdoor furniture that adapts to many different living needs. It can be easily inserted into small spaces such as balconies and can furnish larger domestic and public patios with style.

← UZ lounge chair (**Uz.12**) in light teak with armrests rope in cod. 853.

↑ UZ lounge chairs (**Uz.12**) in light teak with armrests rope in cod. 581, and HISS coffee table (**Hiss.32.r110**). UZ chairs (**Uz.11**) light teak with armrests rope in cod. 853, UZ table 220 cm (**Uz.33.220**) in light teak.

The legs of the table can be closed, which facilitates the shipment of the product and adds value for those who intend to put away the table for the winter season.
 The table is available in three sizes: 180x90 (70¾ x 35½inch), 220x100 (86½x 39¼inch), 250x100(98½x 39¼inch) cm and in a round shape of 140 (55 inch) cm in diameter.

↑ UZ chairs (**Uz.11**) in light teak with armrests rope in cod. 1102, UZ table 250 cm (**Uz.33.250**) in light teak. → UZ chairs (**Uz.11**) in light teak with armrests rope in cod. 2022.

The pure lines of the UZ collection define a timeless, essential, balanced, and, at the same time, serene and harmonious shape.

Structure is made of original teak wood, while YAAZ synthetic rope bands are used for outdoor applications. YAAZ rope is a yarn produced by the company that offers high protection against the sun and atmospheric agents. Internal paddings are made of FoamDry material. Sunbrella fabrics made of acrylic fibers are used for outdoor applications.

→ EDI stackable chair can be made entirely of aluminum or with the backrest in original teak.

↑ EDI chair (**Edi.11**) in aluminum cement grey with light teak backrest and EDI chair (**Edi.11**) in aluminum copper brown.

➔ EDI chair (**Edi.11**) in aluminum copper brown and EDI chair (**Edi.11**) in aluminum cement grey with light teak backrest.

The stools are made entirely of aluminum. Comfortable, and light, they are suitable for any indoor and outdoor use in private homes and contracts.

↑ These two EDI stools (**Edi.14.95/ Edi.14.85**) made of aluminum are available in two heights: 95 cm (37 $\frac{1}{2}$ inch) and 85 cm (33 $\frac{1}{2}$ inch).

The soft fittings define the purity of the shape that seems to welcome instantly. The cushions offer high comfort as well as extremely performing technical characteristics.

The backrest angle of the lounge is widely adjustable.

The UZ sunbed has a structure made entirely of original teak which makes it precious both from a material and functional point of view.
The cot provides adjustment of the backrest, which, when raised, frees up a space with a container edge for storing towels, clothes, and personal items.

The clean and softly joined shapes are completed by a removable cushion and the internal padding is made of Foam Dry.
The purity of a timeless, elegant, and refined design is added to the practicality and durability required of an outdoor furnishing accessory.

← UZ sunbed (**Uz.17**) with structure in original light teak and cushion made with YAAZ fabrics Aks sky.

OVA

YAAZ lab + angelettiruzza design

A lively and sartorial rhythm.

OVA is a modular seating system that furnishes the outdoor space of the home as a natural extension of the interior.

Comfort, beauty, and modularity combined with the solidity and quality of the materials used make OVA an outdoor collection that can be inserted into any public or private environment.

The art of overlapping different textures, different heights of backrests, and different materials transports indoor life outdoors and amplifies the concept of comfort. This creates an asymmetrical trend, a harmonious and non-conventional rhythm.

Personalization, flexibility, color, OVA is a modular seating system with a lively character. The structure is in aluminum and is characterized by the design of the backrests which changes with their height. The presence of the ropes, available in many different colors and textures, enhances the aesthetic and material qualities of the collection. The geometries are simple and original. The comfort and softness derive from the deep seat and the presence of many freely available cushions on the backrest.

↑ OVA sofa (**Ova.15.242**) in the 242 cm version, with light beige structure, back in aluminum and rope.

➔ Two modular OVA compositions. The first (left) consists of an ending element (**Ova.75ov**) and an end element (**Ova.71ov**). The second (right) composed of terminal element (**Ova.71ov**), an angular element (**Ova.74ov**), a middle element (**Ova.77ov**) and a terminal element (**Ova.75ov**).

YAAZ wants to offer its customers the possibility to express themselves in a personal way through chromatic choices and sartorial materials. OVA is an expression of this corporate philosophy and offers a very high degree of versatility, ranging from the use of ropes that create a rich material weave to the choice of mesh characterized by an exclusive YAAZ design or the bare purity of aluminum. The available elements can coexist together, creating an eclectic and original architecture, or more homogeneous choices can be made based on personal aesthetics and usage needs.

↑ OVA composition made up of two terminal elements, one with a rope backrest (**Ova.71ov**) and the other with aluminum backrest (**Ova.75ov**).

→ Three OVA modules. A terminal element with rope backrest (**Ova.72ov** also available with aluminum and metal mesh backrest), an angular element with aluminum backrest (**Ova.73ov** also available with rope backrest) and a terminal element with rope backrest (**Ova.76ov** also available with aluminum backrest).

OVA lounge chair (**Ova.12**) 87x95 h 76 cm (34¹/₄ x 37¹/₂ h 30 inch).

BARLA

angelettiruzza design

Generous
welcome
and a
profound
sense of
wellness.

BARLA well interprets the philosophy of YAAZ which is based on the desire to generate a flowing continuity between the indoors and outdoors. The collection conveys the spaciousness and the energy of outdoor environments within a wide range of elements capable of evoking a sense of intimacy, comfort, and relaxation.

Living outdoors in the open air helps us to feel free and allows us to experience the sound and scent of the air.

The BARLA padded collection seems almost suspended, evoking contact with the sky, even though it is very low and close to the ground.

The shapes are sinuous because in nature nothing is rigid.

BARLA invites you to assume freer positions of the body and let yourself go softly, experimenting with new comfort zones.

Formal balance, harmony, grace, and simplicity are the qualities that inspired this collection.

↑ Two aluminum tubes, running always parallel to each other both in straight and in curved sections, define the wide and harmonious profile of the lounge chair. Among these, a rope weaving holds and hosts the wide cushions hinged to the structure.

↑ BARLA sofa available in two dimensions (**Barla.15.265**) 265x100 (104¼x 39¼inch) and (**Barla.15.215**) 215x100 (84¼x 39¼inch).

→ BARLA sofa (**Barla.15.265**) in the 265 cm version with structure light beige and rope cod. 803, and BARLA coffee table (**Barla.32**) with structure dark beige.

The playful and rounded shapes of the BARLA collection are ideal for dressing up in color and furnishing many different environments, from the more sober and elegant to the more effervescent and pop ones. You can play endlessly between the color combinations of the ropes, metal, and fabrics in the catalog, creating made-to-measure looks.

Structure in aluminum, YAAZ synthetic rope bands for outdoors, a yarn produced by the company with high protection to the sun and to the atmospheric agents. Sunbrella fabrics made of acrylic fibers for outdoor use.

↑ BARLA lounge chair (**Barla.12**) with structure dark beige and rope cod. 803

→ BARLA lounge chairs (**Barla.12**) with structure light beige and rope cod. 853. BARLA chairs (**Barla.11**) with structure light beige and rope cod. 803. HISS coffee table (**Hiss.32.r110**) structure black and porcelain green top.

The table follows an elongated profile that is composed in an oval shape. The aluminum structure is characterized by a round insert in Ment, a composite material with a mottled appearance obtained by a mixture of fragments of marble, granite, basalt, and metal in a cement matrix, or HPL.

Comfortable, and enveloping, the BARLA chair is ideal for enjoying moments of conviviality in the open air because it combines design, comfort, and functionality.

← BARLA chair (**Barla.11**) with structure copper brown and rope cod. 156.

↑ BARLA chair (**Barla.11**) with structure oyster white and rope cod. 999.

↑ These two BARLA stools (**Barla.14.90 / Barla.14.80**) made of aluminum and with rope backrest are available in two heights 90 cm (35½inch) and 80 cm (31½inch).

↑ BARLA collection lends itself to countless interpretations from the point of view of colors and finishes. In the monochromatic version, it appears sober and elegant but reveals an energetic and lively soul if you play with the contrast of colors and finishes.

The interpenetration of shapes on the BARLA table top arises from the observation of new behaviors and ways of use. It emphasizes the possibility of experiencing several functions at the same time such as working, eating, and playing.

BARLA technical sheet

TURTLE

YAAZ lab

The
sweetness
of a
memory.

The TURTLE collection includes a rocking armchair, small lounge chair, chair, stool, table, bar table, coffee table, and patio daybed. The collection features a simple design that evokes the warmth and comfort of cherished memories, such as a cozy crib or a mother's embrace. The chair is constructed entirely from aluminum, making it durable enough to withstand extreme weather conditions.

The small lounge chair and rocking armchair come with generously padded cushions for added comfort and softness, which can be easily removed for cleaning.

↑ The TURTLE collection consists of three types of seating: chairs, lounge chairs, and rocking armchairs. The legs of the chairs and lounge chairs are available in either teak wood or aluminum.

→ TURTLE chair (**Turtle.11**) with aluminum legs, two TURTLE lounge chairs (**Turtle.12**) with aluminum legs, one TURTLE rocking armchair (**Turtle.13**) and a round TURTLE coffee table (**Turtle.32.r57**).

The backrests of the chairs in the TURTLE collection are available in either aluminum or a combination of aluminum and woven ropes. This, along with the option to choose the material of the legs, makes the collection extremely versatile and suitable for furnishing any type of environment.

↑ TURTLE lounge chair (**Turtle.12.w1**) with a dark beige structure, light teak legs and rope backrest with code. 156.

➔ TURTLE rocking armchair (**Turtle.13**) with a dark beige structure and rope backrest with code. 156.

← Two TURTLE stool (**Turtle.14**), one with an oyster white structure without a rope backrest and the other with an olive green structure and a rope backrest with code1003, as well as a TURTLE bar table (**Turtle.31**) with a beige pink aluminum structure and top.

↑ TURTLE table (**Turtle.33.r80**), three turtle chairs with rope backrests (**Turtle.11**) one rocking armchair (**Turtle.13**) and ANKA sunbed (**Anka.17**).

→ TURTLE square tables available in two sizes: (**Turtle.33.90**) 90x90 (35½ x 35½ inch) cm, (**Turtle.33.70**) 70x70 (27½ x 27½ inch) cm and TURTLE round table available in one size (**Turtle.33.r80**) 80 cm in diameter (Ø 31½ inch).

Also ideal for contract use, the TURTLE table, which is available in three different sizes: 90x90cm (35½x 35½ inch), 70x70 cm (27½x 27½ inch) and 80 cm in diameter (Ø 31½ inch). The table is made entirely of aluminum, making it light weight and durable. The legs are also removable to facilitate easier and more sustainable transport.

ADA

angelettiruzza design

An
island
of well-being
that
reinterprets
life
outdoors.

ADA is a sofa with generous proportions that offers a 360 ° view. Like an island in the open sea, it offers different bends and views and invites new and relaxed ways of use.

It is an oasis, a flying carpet, a platform to be experienced based on the feeling of the moment. A place where you can rest, play with your children, work, have time to yourself, or share with others.

It offers the softness and embrace of the cocoon-effect cushions, but also the possibility of having more sustained support while you eat, meditate, sunbathe or simply chat.

Its soft shapes enhance the tactile and expressive qualities of the fabrics.

It is an immediately understandable product that fits with character into any type of environment, public or private.

ADA is a sofa designed to provide a 360° experience, furnishing both private and public outdoor spaces with naturalness and personality. It is a highly durable and sturdy piece of furniture, thanks to its advanced technology.

The designers, Silvana Angeletti and Daniele Ruzza, describe it as follows:

"Have you ever experienced the feeling of suspension when you're in the middle of the sea, on a stationary boat, or on a small island? You let yourself go, with only the warming sun, the sound of the water, and the breeze caressing your skin... Well, we imagined this sofa as a 360-degree open-air living space, without a specific direction. A place to rest, work, or share moments with others, depending on the situation. It provides the softness of cocoon-effect cushions but also offers more sustained support for activities such as eating, meditating, or simply talking".

↑ ADA sofa (**Ada.15**) with back seat in Aks wood and the front seat and backrest in Rayas lake. UZ lounge chair (**Uz.12**) in light teak, rope armrests cod. 2022 and cushion in Aks grass. ANKA

YAAZ lab

Comfort
and
relaxation
for the
outdoor
living area.

ANKA is a sunbed that can be easily moved thanks to the large rear wheels. The shape is simple and functionality is guaranteed. It is made of aluminum which is a light weight and hard metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. It is also the most popular. Although it is extremely water resistant on its own, it is recommended to add color with polyester electrostatic powder coating.

↑ ANKA sunbed (Anka.17),

SAYE

angelettiruzza design

Quality
of materials,
workmanship,
and shape
for
a timeless
chair.

SAYE is a contemporary reinterpretation of the classic folding director's chair. It is comfortable, solid, functional, and beautiful, with a structure made of die-cast aluminum. This material and technology ensure exceptional outdoor performance, such as lightness, resistance to the elements, and sturdiness. YAAZ offers its original interpretation of this space-saving product, which is a true status symbol with an illustrious and ancient history.

↑ SAYE director chair (**Saye.11**) with a red brown structure, light teak armrests and Sunbrella Sling fabric Augustine oyster.

→ One open SAYE director chair (**Saye.11**) with a terra brown structure and light teak armrests and one closed SAYE (**Saye.11**) director chair with a light beige structure.

The functionality of saving space by making the chair foldable and therefore easily transportable and storable is brilliantly resolved by the die-cast aluminum which designs the opening and closing joint of the seat with great lightness.

The seat and back of the SAYE chair are made with "Sunbrella Sling" which combines the strength of PVC with the softness and innovation of Sunbrella acrylic yarn which, in addition to offering a precious texture, guarantees greater comfort.

↑ SAYE has original teak inserts on the armrests that make prolonged use comfortable. The fabric that makes up the seat and back has been designed in such a way that it is completely removable to facilitate cleaning and possible replacement.

COMPLEMENTS

SWEET

@violanellaiuola

The imagination sees.

SWEET furnishing accessories are much more than a pillow and a blanket joined together.

They represent the care and love that YAAZ has towards its audience and the desire to offer them beauty at 360 degrees.

Designed by @violanellaiuola, a young Italian fashion designer, they are a concentration of beauty and functionality, a real work of art that captures the imagination for its explosive creativity.

What we find represented in SWEET is a fantastic world, where female creatures live in symbiosis with nature, there is no form of separation, and a harmonious and fluid understanding is celebrated.

SWEET is available in six different versions with variations in color and material. In five of these versions, the cushions are covered with SUNBRELLA fabrics on the outside, making them adaptable to all types of products and environments.

materials and finishes

ALUMINUM

most popular metal

Aluminum is a light weight and strong metal with an excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Although aluminum is the most popular material for outdoor furniture, despite being light weight, it is durable and can be easily processed into various complex shapes. While it is extremely weather-resistant on its own, it is recommended to be coated with polyester electrostatic powder for added protection against the elements and scratches, as well as to add color to the product. Since the electrostatic powder paint adheres better to the metal, it also makes the product much more resistant to fading. As with other metals, aluminum can warm up or cool down depending on weather conditions, so it is recommended to use it with a cushion for comfort.

TEAK

handsome wood

Being in high demand as well as being available in limited availability, this durable and attractive wood is the most popular wood choice for outdoor furniture. Because teak has many features that make it ideal for outdoor use. It is extremely strong and does not easily bend, crack, or become brittle, unlike many other types of wood. This is because teak repels most water and does not expand or contract during the drying process. It has a high natural oil content that makes it highly resistant to rot and insect damage. This resistance to external factors allows teak wood can last for a long time, up to fifty years or more. The gorgeous honey brown look can be maintained with minimal oiling or treatment if left untreated, can turn into an attractive silver gray over time. It is relatively easy to maintain and can be cleaned with mild soap and water or teak-specific cleaners.

MENT

the limitlessness of nature

High-strength terrazzo plates produced with the highest quality natural stones. "Placco terrazzo slabs", branded as Ment, are produced by mixing marble, granite, basalt, metal chips, glass pieces, and different aggregates with cement paste. A first-class appearance is obtained with homogeneous color and aggregate distribution on large surfaces.

Ment plates provide wide possibilities for different designs in spaces with the resistance to color fading and unlimited color and a wide variety of dimensions, especially for outdoor use.

YAAZ ROPE

colorful

We created a colorful collection with our YAAZ synthetic outdoor weaving yarns. Thanks to the additives and special pigments used in production, sunole yarns with high protection against sun and weather conditions, high color fastness and high strength are the main parts of our YAAZ synthetic rope bands collection. The color scale, which can be easily combined with our aluminum frame colors, has been specially selected and produced by our design team. Rope accessories adopted in outdoor furniture in the world will gain a brand new atmosphere with YAAZ synthetic rope bands colors.

PERFORATED SHEET

aesthetic effects

Durable Perforated Sheets Offer Stunning Aesthetic Effects. Meanwhile, various decorative hole patterns are available, such as triangular, diamond, hexagonal, four-point star, oblong, etc. Our custom patterns are carefully selected for our collection.

PORCELAIN

Among the different types of ceramics, porcelain is the most precious, by virtue of its particular compactness, resistance, impermeability, whiteness, and luster.

Porcelain is a water-repellent material, the water absorption of this material is zero, and extremely resistant to chemical and atmospheric agents and to compression and traction, which makes it particularly suitable for outdoor products.

SUNBRELLA SLING

Redefine Sling Furniture

Focusing on subtle patterns that read as textures, Sunbrella Sling allows you to achieve an elevated indoor aesthetic in an outdoor setting. Unlike traditional PVC slings that are stiff and uncomfortable, Sunbrella Sling blends the strength of PVC with the softness of Sunbrella acrylic yarn for added comfort. By blending natural color palettes with novelty threads for added texture and luxury, Sunbrella Sling is ideal for crafting fully-upholstered furniture pieces for outdoor patios and other traditional sling applications.

SUNBRELLA FABRICS

100% Sunbrella Acrylic

Outdoor fabrics made from acrylic fibers are strong. It is more resistant to both weather conditions and usage errors such as mold, friction and tearing. This is especially important for outdoor flooring in active residential and commercial applications.

Before weaving, acrylic fabric threads are dyed with the solution. This allows the fabric to retain its color longer, even when exposed to direct sunlight. In addition to its water repellency, acrylic fabrics are more breathable than other options and allow the fabric to stay cooler in hot weather. It is also easy to clean with soap and water. So; Acrylic fabrics are a multi-purpose textile product that should be preferred in outdoor furniture.

Sunbrella® acrylic fabrics are considered premium for outdoor textiles. Sunbrella® is long-lasting compared to its counterparts and therefore provides long-term savings. If you especially care about UV protection, the best choice would be Sunbrella® products.

MARINE LEATHER

Sailor

Marine Leather is an environmentally friendly artificial leather with superior design and durability. When used in our products, which have undergone superior design processes, Marine Leather provides world- accredited Oeko-Tex® certification, ensuring that all harmful substances have been completely eliminated from the textile materials. We prioritize your health by providing transparent information about our materials. Our artificial leather provides superior durability due to its weather resistance, quality workmanship, and advanced technology. In addition to its water- repellent properties, Marine Leather’s non-burning feature also guarantees its long life span.

Z-PACT/HPL

decorative high pressure laminate

Superior features of Z-Pact surface technology;

- Non-finger printing surface
- Soft-touch ultra-matte finish
- Low light reflection due to ultra-color density
- Easy to clean
- Resistance to house hold and laboratory chemicals
- Anti-bacterial properties for safe food contact
- High heat resistance and temperature/cold resistance
- Long-lasting durability thanks to micro-scratch, impact and abrasion resistance, thermal healing repair, flame retardant, and water repellent properties
- Zero-HPL, which is reinforced with pine or ganic polymer(lignin), has a stylish appearance and is extremely hard.
- Thanks to these superior properties, Zero-HPL is ideal for outdoor applications.
- Lignin is a complex organic polymer that builds up in the cell walls of many plants, making them hard and woody.

FOAM DRY

Open-cell Technology

Foam Dry is an innovative open-cell technology that allows for quick and efficient moisture management. Its unique design promotes air flow and evaporation, which helps to prevent the growth of mold, mildew, and bacteria. FOAM DRY is ideal for a furniture cushions. Its breath able and moisture-wicking properties provide superior comfort and hygiene, making it a popular choice for consumers and manufacturers alike.
