YAAZ®

beauty.
nature.
soul.

beauty. nature. soul.

Nature is our greatest home and a timeless source of inspiration not just for its visual beauty but also as a philosophical approach to life.

Furniture design with a strong visual identity that invites conviviality. A fusion of functionality, innovation, and beauty that strikes a perfect balance between timeless elegance and contemporary dynamism.

Every YAAZ product is the result of a constant quest for innovation, where advanced technical solutions are combined with a design that responds to the needs of the people who live in the spaces. The combination of premium materials and cutting-edge technology results in beautifully crafted products, with intelligent design solutions and refined finishes that enhance both ease of use and contemporary beauty.

YAAZ offers a complete furniture collection, designed in Italy to integrate perfectly into any type of architectural space, both indoor and outdoor. Whether for private residences, luxury hotels, exclusive resorts, elegant workspaces, expansive gardens or high-class yachts, YAAZ products are ideal for transforming any environment into a refined and welcoming space.

The YAAZ factory operates at the highest standards of excellence, combining advanced numerical control technologies and high craftsmanship to create products that meet the highest standards of the global market.

YAAZ: draws energy from the sun and inspiration from nature.

sustainability

YAAZ Sustainability Strategy & Environmental Management

Data is collected and stored in accordance with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, and ISO 10002:2018 quality management systems.

Greenhouse Gas Reduction Initiatives

YAAZ plans and implements various initiatives to reduce or prevent greenhouse gas emissions. Through these efforts, the company aims to measure and assess emission reductions achieved as a result of its greenhouse gas mitigation and removal strategies. YAAZ is committed to protecting the environment and creating value for society within the framework of its sustainability vision. To achieve this, the company has established three key pillars of sustainability: Environmental Responsibility, Social Impact, and Corporate Governance.

Sustainable Material Use: YAAZ aims to reduce its carbon footprint by promoting the use of recyclable and environmentally friendly materials in production processes. Sustainability principles are also prioritized in supplier selection.

Digitalization and Paper Reduction: YAAZ seeks to minimize paper consumption by digitalizing processes related to purchasing and sales. This initiative not only reduces material waste but also enhances investments in digital infrastructure.

Green Office Practices: To improve energy efficiency in office spaces, YAAZ is implementing green office practices, increasing greenery, and encouraging employees to adopt energy-saving behaviors.

Zero Waste Program: YAAZ is committed to minimizing waste and increasing recycling rates by providing the necessary infrastructure and training. The company sets targets to achieve zero waste in its production processes.

Carbon Footprint Analysis: YAAZ will conduct regular annual carbon footprint assessments to identify areas for improvement. Progress and strategy effectiveness will be monitored through annual reports.

Social Awareness Projects: The company will organize social awareness initiatives, seminars, and interactive events to educate the community on reducing carbon emissions.

Cleaner Fuel Use: YAAZ aims to lower carbon emissions by transitioning to low-emission fuels.

Energy Management: In pursuit of lower electricity consumption, YAAZ plans to implement energy-efficient lighting systems and provide training to employees on electricity conservation.

Water Efficiency: YAAZ will conduct awareness programs for employees on efficient water management to optimize domestic water usage.

Afforestation Activities: To offset carbon dioxide emissions, YAAZ will engage in afforestation projects to expand carbon sinks.

Sustainable Transportation: YAAZ is developing a roadmap to encourage the use of electric and hybrid vehicles to reduce transportrelated emissions. The company promotes the adoption of electric vehicles by reducing travel and transport needs and encourages the use of public transportation when necessary.

Renewable Energy Production: YAAZ generates its own electricity using renewable energy sources, primarily solar power. By harnessing energy from the sun, the company reduces reliance on fossil fuels, lowers carbon emissions, and strengthens its commitment to sustainable energy solutions.

YAAZ team

italy
angelettiruzza design

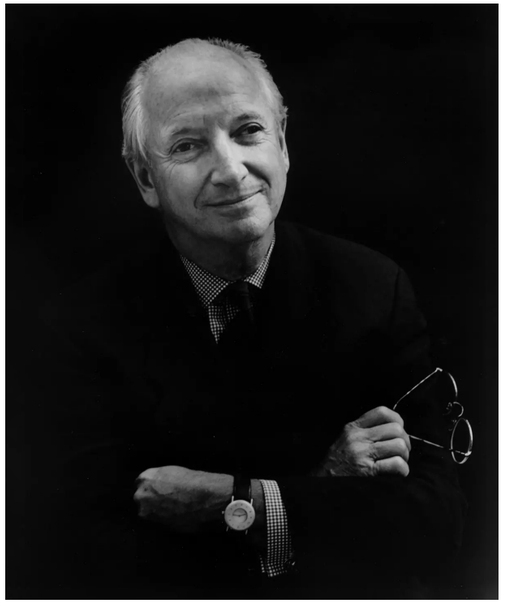

Silvana Angeletti and Daniele Ruzza are Italian industrial designers, internationally recognized for their ethical vision, which is understandable and close to people. Founders of their own studio in 1994, they design essential, functional objects capable of withstanding the passage of time. Their work, characterized by a solid and long-glasting career, challenges the logic of mass production while maintaining a distinctive style that can be recognized in every creation. Some of their products are part of the permanent collection of the Chicago Athenaeum Museum, and many others have been awarded the most prestigious international design honors.

italy
raffaella mangiarotti

Raffaella Mangiarotti is an architect and designer. She lives and works in Milan. She holds a degree in architecture, a doctorate in design, and is a researcher at the Politecnico di Milano. After working with Marco Zanuso and Francesco Trabucco, she founded deepdesign with Matteo Bazzicalupo, designing innovative products for major companies in the sector, including Smeg, Whirlpool, and DaimlerChrysler. In 2010, she founded the Raffaella Mangiarotti studio, where she specializes in art direction, furniture elements, showrooms, and exhibition design, designing internationally. Some of her products are exhibited in international museums and exhibitions and are part of permanent collections, recognized with international awards. From 2017 to 2024, she was appointed Ambassador of Italian Design in the world.

united states
michael graves design

Rob Van Varick and Donald Strum are industrial designers who have collaborated with Michael Graves for more than 40 years and now continue his legacy of designing functional, accessible, and beautiful products. Their firm, Michael Graves Design, is a 60-year-old company staffed with product designers, graphic designers, experiential designers, interior designers, and architects. Utilizing decades of experience, the firm collaborates with YAAZ to design products for the American market. This group, which focuses on creating products that fit the continent's lifestyles, possesses the leadership and knowledge to envision projects through multiple lenses.

france
patrick norguet

Patrick Norguet befittingly illustrates the definition of a designer. He is at the core of a collective and innovative approach to design and stands as one of the protagonists of a project.
Patrick Norguet effortlessly masters all scales and lends his expertise to manufacturers and producers of objects, lamps and furniture, all that while developing the new hotel concept of the Okko chain in France in 2014. He has become an emblematic figure of French design.

türkiye
yaaz lab

YAAZ Lab is a workshop where creative processes are shaped freely, where design meets function and aesthetics. This space, which came to life with the collective vision of the YAAZ team, transforms the intimate relationship established with the material into unique collections by blending it with craftsmanship and innovation. Every detail is meticulously designed to enrich the user experience and add character to the spaces.

BARLA collection

angelettiruzza design

Aluminium and rope
meet to create the iconic
BARLA collection.

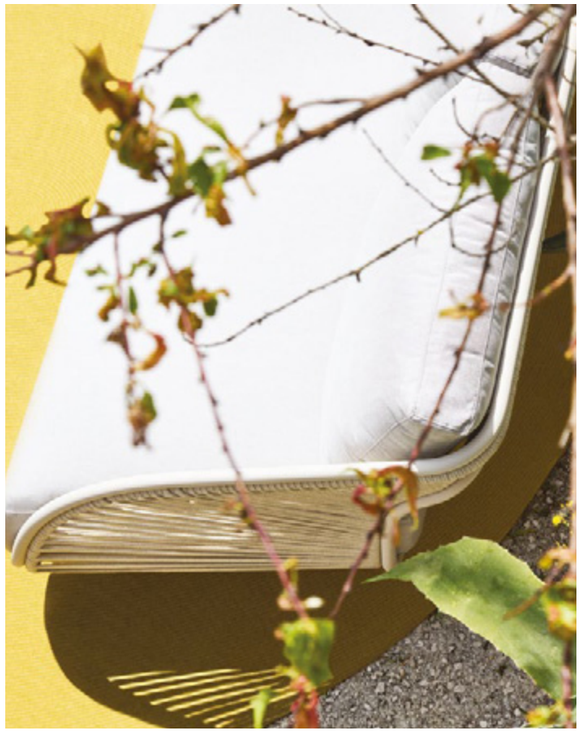

Generous aesthetics, combined with a wraparound design conceived for maximum well-being, make the BARLA collection the ideal choice for those who wish to experience their outdoor spaces with casual elegance, without sacrificing functionality or total comfort.

Solid and durable, our products are created to bring beauty and harmony to the world.

barla sofa

The BARLA collection seems to be suspended in the air, as if seeking direct contact with the sky, but at the same time it is deeply rooted in the earth. This duality, between lightness and solidity, between high and low, is its distinctive essence.

barla armchair

The BARLA collection offers endless style possibilities, thanks to the ability to play with the colors of the ropes and aluminum. In its monochromatic version, BARLA exudes sobriety and timeless elegance, with neutral tones that seamlessly blend into any environment. The purity of its lines and the simplicity of its forms are showcased in their full beauty, evoking a sense of calm and tranquility.

barla club chair

archiproducts DESIGN AWARDS

The BARLA club chair, with its cozy and comfortable shape, is the perfect addition to lounge areas in hotels and resorts. Inspired by the softness of a cocoon, its design creates an intimate and relaxing atmosphere, ideal for convivial spaces.

barla chair

BARLA reveals a mediterranean sunny soul energetic and lively when featuring bright, vibrant colors for the ropes and aluminum. Each space can be uniquely interpreted and personalized, thanks to the wide selection of colors.

barla table

The BARLA table is not just a surface for eating, playing, or working, but a platform for natural, fluid interaction and enjoyment. The harmonious shapes and the combination of different materials emphasize its versatility, making it a product that reflects the evolving uses and behaviors of contemporary society.

barla bar & counter stool

Made of high-quality stainless steel, the footrest offers excellent resistance to scratches and abrasions that could damage the aesthetics of the product with frequent use.

TURTLE collection

YAAZ lab

The TURTLE collection is inspired by the warmth of childhood memories, featuring a combination of teak wood, aluminum and rope.

turtle chair

The legs of the TURTLE chair are available in elegant teak wood or aluminum, allowing flexibility in choosing the material that best complements the style and ambiance of any space.

turtle S chair

In this version, the chair is crafted entirely from aluminum, ensuring durability even in extreme weather conditions.

turtle armchair

The TURTLE collection offers exceptional customization possibilities, featuring a wide range of material and color combinations that enable tailored designs to suit diverse tastes and settings. From the natural warmth of teak to the versatility of aluminum and the vibrant appeal of ropes, each element encourages creative expression.

turtle rocking chair

In its rocking version, the TURTLE armchair becomes a cozy nest of peace and intimacy. The gentle rocking motion, combined with its spacious seat, enhances the sense of relaxation and comfort.

turtle daybed

With its generous dimensions and gently rounded contours, the TURTLE daybed is designed to invite relaxation whether indulging in quiet solitude, enjoying a captivating read, or sharing conversation with company. The backrests are thoughtfully crafted, offering options in sleek aluminum or an elegant combination of aluminum and intricately woven rope, blending comfort with refined aesthetics.

turtle bar stool

turtle table series

Also ideal for contract use, the TURTLE table is available in three different sizes. Made entirely of aluminum, it is lightweight and durable.
The legs are also removable, facilitating easier and more sustainable transport.

turtle bar table

turtle desk

turtle coffee table

Sturdy yet lightweight, the TURTLE coffee table is ideal for furnishing any contract outdoor space. Available in two sizes, it is made entirely of aluminum, with an alternative version featuring aluminum legs and an HPL top.

UZ collection

angelettiruzza design

Natural elegance and contemporary design.

The UZ collection fits naturally into any environment. Well-balanced, aesthetically pleasing, and rich in character, UZ is a furniture collection that thrives both indoors and outdoors, thanks to the richness of the materials used and the timeless quality of its design. Inspired by the geometric form of a cylinder, which has been cleverly interpreted and adapted in height and diameter to meet the functional and structural needs of the collection, each piece emanates a dynamic and strong presence. At the same time, it maintains an elegant, modern aesthetic that can easily integrate into any context.

uz armchair

Boasting a strong visual impact, the UZ collection is a furniture line that embodies a classic soul, evoking the exotic and enchanting atmospheres of past travels to distant worlds.

uz sofa

Seats and backs are complemented by soft, removable cushions that enhance the overall feeling of comfort and relaxation, reflecting the company's philosophy of outdoor living.

uz lounge

The UZ lounge is made from fine teak wood sourced from Myanmar, where the optimal ecological conditions support the cultivation of these exotic and valuable trees. Known for its dimensional stability, hardness, and water resistance, it is highly durable and can withstand temperature variations, humidity, salt, and weathering.

uz club chair

The UZ club chair is extremely comfortable and compact, integrating seamlessly into any space while maintaining the high standards of quality that characterize YAAZ's production.

uz chair

The clean lines of the UZ collection define a timeless, balanced, and simple form while adding a touch of personality to any environment.

uz foldable table

Simple yet ingenious, the UZ table exemplifies thoughtful design. Its teak legs can be easily folded down via a clever rotational mechanism, allowing the support structure to nest neatly within the table. Available in various sizes and shapes, it offers versatility for different spaces while ensuring effortless transportation, space efficiency during shipping, and convenient storage during the off-season.

uz desk

uz bar & counter stool

uz sunbed

With the UZ sun lounger, every moment of relaxation in the open air is enhanced by functional and refined design, combining the sensory and material qualities of teak with an intelligent space-organizing solution for total comfort. The sun lounger features an adjustable backrest that, when raised, reveals a storage rim for towels, clothes, and personal items.

uz double sunbed

Offering irresistible comfort, the UZ double sunbed accommodates two people and ensures maximum wellbeing.
The adjustable backrest, when raised, creates a space with a storage rim for towels, clothes, and personal items.

uz daybed

The clean, softly contoured shapes are complemented by a removable cushion with internal padding made of Foam Dry. The purity of a timeless, elegant, and refined design is balanced with the practicality and durability required of an outdoor furnishing accessory.

Teak wood is particularly well suited for outdoor use due to its durability, robustness, and strength. The natural teak blocks we import from Myanmar are processed in our factory through all stages until they become finished products.

DENK collection

angelettiruzza design

Design that evokes qui-etness.

Made from precious teak wood, the DENK seating line features generous volumes and large dimensions, including a chair, armchair, and sofa.

denk sofa

The structure is made of original teak wood, while YAAZ synthetic rope cables are used for outdoor applications. YAAZ rope, a material produced by the company, offers excellent protection against the sun and atmospheric elements.

denk armchair

The DENK collection combines elegance and comfort, creating a luxurious outdoor living space. The fine teak wood from Myanmar, paired with the warm tones of the woven ropes and high-quality Sunbrella fabrics, makes this collection ideal for any architectural project or residential setting.

The line includes chairs, armchairs, and sofas in two sizes, all designed to offer ample seating space, perfect for outdoor relaxation. The DENK collection features precise design with timeless allure, where wood, rope, and fabric seamlessly combine style and functionality. It represents the perfect blend of classic teak garden furniture and contemporary form.

denk chair

The line includes chairs, armchairs, and sofas in two sizes, all designed to offer ample seating space, perfect for outdoor relaxation. The DENK collection features precise design with timeless allure, where wood, rope, and fabric seamlessly combine style and functionality. It represents the perfect blend of classic teak garden furniture and contemporary form.

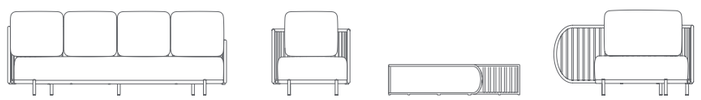

The DENK chair strikes the perfect balance between solidity and comfort, designed to offer a pleasant seating experience for long hours spent around the dinner table with friends, ensuring complete relaxation.

OVA collection

YAAZ lab + angelettiruzza design

A lively and modular rhythm.

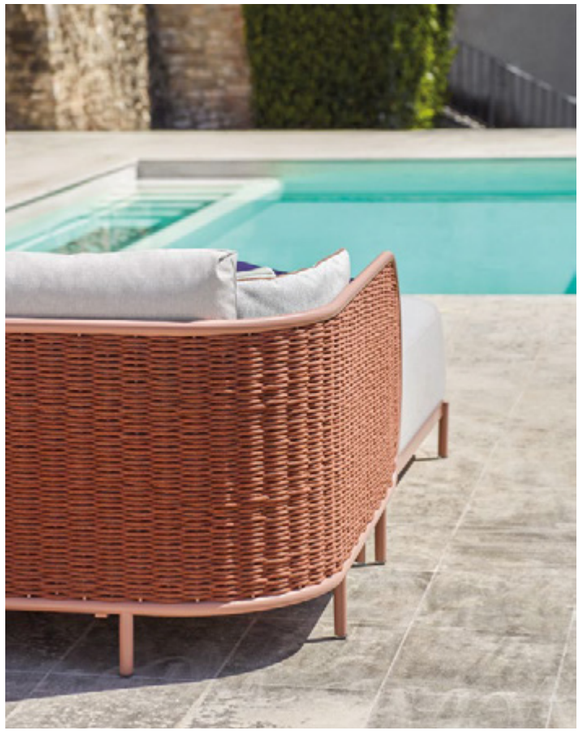

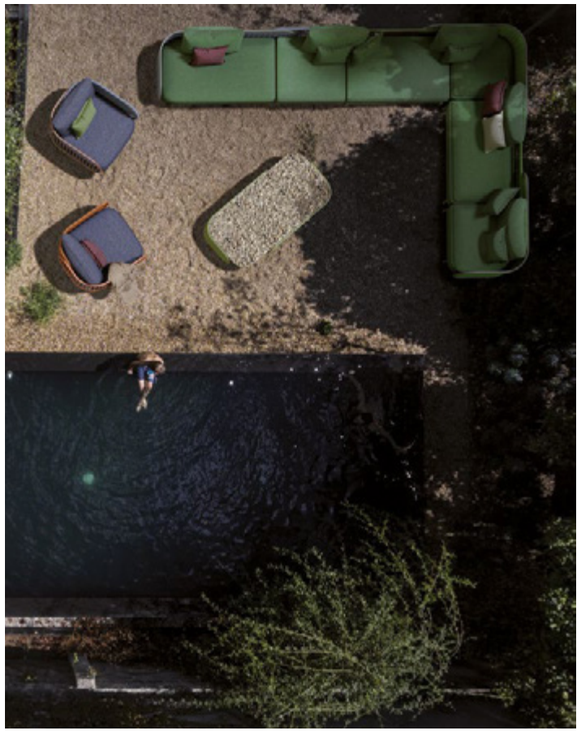

OVA is a modular seating system with a lively, dynamic character, designed for maximum customization as well as flexibility. Its aluminum frame is lightweight yet weather-resistant. The backrest design features an interplay of different shapes and heights, which can be adjusted to fit the chosen configuration, offering a variety of aesthetic and functional solutions. Comfort is a standout feature of OVA: the deep seat, combined with the option to add cushions freely placed on the backrest, ensures each seat is exceptionally comfortable and cozy. This system provides not only a wide range of combinations and configurations but also a relaxation experience that is tailored to meet every need, whether in residential or contract settings.

The presence of ropes, available in a wide range of colors and textures, adds a unique aesthetic and material dimension to the collection, enhancing its versatility and contemporary appeal. OVA's geometries are both simple and original, with clean lines that strike a perfect balance between functionality and innovative design.

ova modular

YAAZ aims to provide its customers with the opportunity to express their individuality through color choices and tailored materials. OVA embodies this philosophy by offering a high degree of versatility. From the rich material weave created by the ropes to the exclusive YAAZ-designed mesh, and the sleek purity of aluminum, OVA accommodates a range of styles. The available elements can be combined to form eclectic and original arrangements, or more cohesive choices can be made, depending on personal aesthetic preferences and functional requirements.

- *You can find more detailed information about the variations of OVA modular parts on the Technical Info page.*

ova armchair

The backrest of the OVA armchair is designed to be round and enveloping, resembling two arms coming together in a warm and welcoming embrace. This soft, curved shape not only gives the armchair an elegant and distinctive appearance but also creates a sense of deep comfort, gently enveloping those who sit in it.

KORU collection

raffaella mangiarotti

Classic elegance meets contemporary comfort.

The collection is inspired by vintage wrought-iron garden chairs, that trace elegant decorative patterns with slender metal rods. These light and ethereal shapes gain solidity through delicate intersections, giving life to a series of seats with enveloping and welcoming forms.
The airy structures are made even more inviting by soft outdoor cushions, which add warmth and comfort to the metal's rigor. Each piece invites relaxation, transforming outdoor spaces into havens of well-being and conviviality.

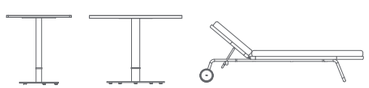

ANKA collection

YAAZ Lab

Comfort in
contact with
nature.

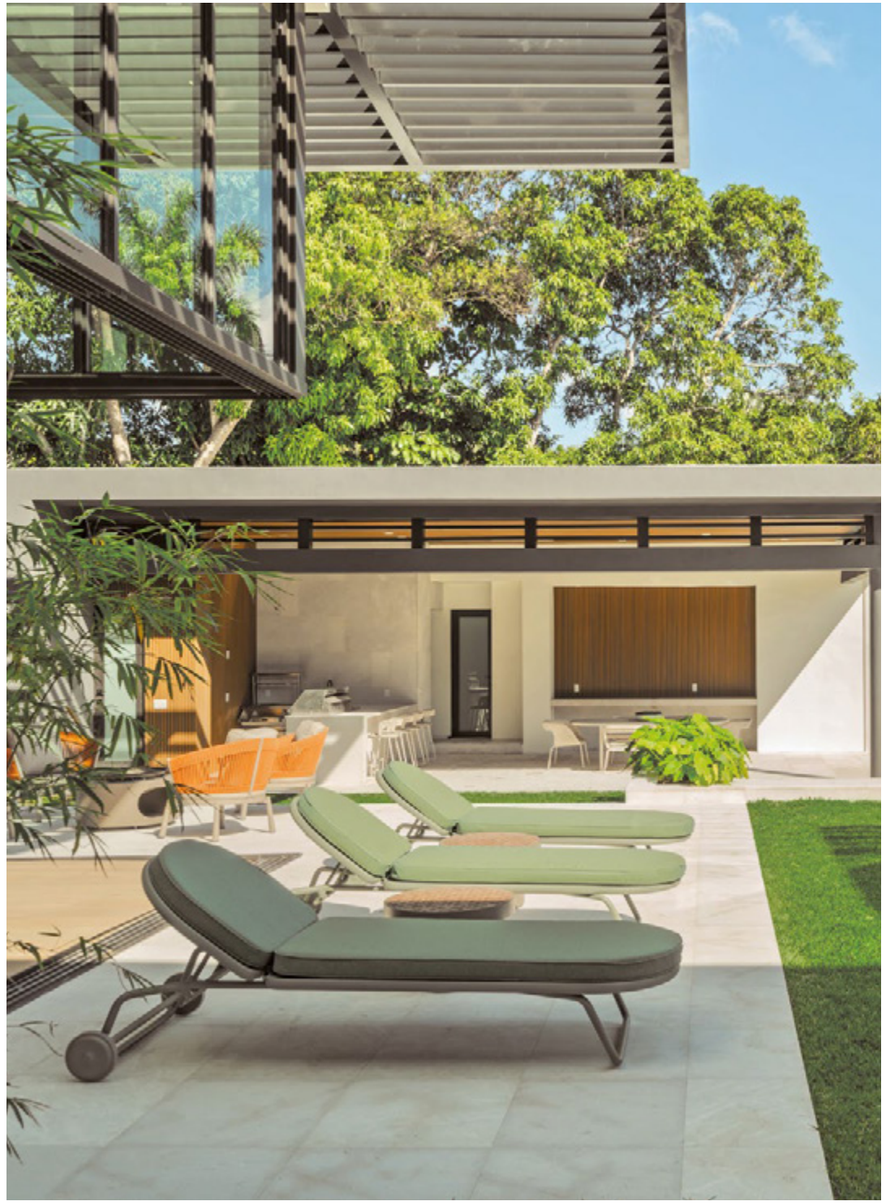

anka sunbed

ANKA is a practical and functional crib designed for both ease of movement and durability. Featuring large rear wheels, ANKA can be effortlessly relocated, making it highly versatile for various spaces. Crafted from aluminum, known for its excellent strength-to-weight ratio and resistance to corrosion, ANKA ensures long-lasting performance in outdoor environments. The frame is coated with electrostatic polyester powder, which is very resistant to water, further enhancing its durability. Available in a wide range of colors, ANKA offers customization options to suit different styles and preferences.

anka table series

The three-piece table leg offers versatile customization with different color combinations to suit various design preferences. The part resting on the base is made from heavy-duty and weather-resistant stainless steel, ensuring durability and long-lasting performance. The tabletop can be selected from a range of materials, including aluminum, Z-Pact, and Ment, allowing for tailored aesthetic and functional choices. The base comes in two size options, ø42 cm and ø62 cm, providing flexibility for different table layouts and space requirements.

HUMA collection

YAAZ Lab

Comfort and style everywhere.

huma sunbed

A standout piece from the 2025 collection by YAAZ Lab, the HUMA sunbed blends modern aesthetics with functional luxury to bring a sophisticated atmosphere to outdoor spaces. Designed with an elegant combination of an aluminum frame and teak wood legs, it maximizes comfort with a backrest adjustable to three different positions. Attention to detail is evident in the genuine leather used for the headrest and handle, while the choice between a wheeled or fixed base offers both freedom of movement and architectural flexibility.

Centering on durability and customizability, the HUMA adapts to any style with 20 different aluminum colors and three distinct teak wood finishes: Natural, Dark, or White. The wood used is certified sustainable Myanmar (Burma) teak, offering natural resistance to outdoor conditions. For upholstery, the choice of premium Sunbrella acrylic fabrics for superior UV protection or water-resistant Yapa fabric series ensures the product retains its color and form for years to come.

At YAAZ Lab, our goal for the 2025 Huma Wheel Sunbed was to create a piece that seamlessly blends rigorous manufacturing standards with the organic beauty of nature. We approached the design process with a focus on sustainable luxury and functional adaptability.

Our process begins with the careful selection of materials. We constructed the sunbed using an aluminum frame supported by teak wood legs. We are deeply committed to sustainability; we do not use forest-origin teak, but rather supply wood solely from sustainable sources in Myanmar that adhere to strict replanting criteria.

ADA
angelettiruzza design

An oasis of comfort that redefines indoor and outdoor life.

ADA is a sofa with generous shapes that can be used from all angles. Like an island in the open sea, it offers different perspectives and invites new, relaxed ways of use. It serves as an oasis, a flying carpet, or a platform to be experienced based on the feeling of the moment—whether you want to rest, play with your children, work, isolate yourself, or share. It consists of a softer section, a nest of plush cushions where you can feel pampered, and a firmer section where you can eat, meditate, work, or sunbathe. Its soft forms highlight the tactile and expressive qualities of the beautiful fabrics in the catalog, made according to the highest standards of resistance to outdoor elements. ADA is a unique and original piece that fits seamlessly with character into any type of architectural space, both outdoor and indoor.

The feeling of suspension and freedom experienced in the middle of the sea, on a boat, or on a small island inspired designers Silvana Angeletti and Daniele Ruzza in the creation of ADA. The concept behind this project is to capture the sense of abandonment and serenity that arises when you let go, where only the warmth of the sun, the sound of the water, and the breeze caressing your skin seem to exist.

RASEL collection

angelettiruzza design

A modular sofa
designed to
encourage sharing and
foster strong
connections
between people.

rasel sofa

The sofa consists of two distinct upholstered modules, allowing for a variety of configurations and combinations. It is customizable to suit different comfort preferences and can be used indoors or outdoors, offering versatility for both environments.

DEDIM collection

michael graves design

Impactful design with a unique character.

dedim chair with table

The collection is a perfect balance of aesthetics, functionality, and well-being: made of die-cast aluminum and Serge Ferrari technical fabric, it redefines outdoor living with its strong and original identity. The accessories, reflecting the DNA of Michael Graves Design, further define the chair's unique character, seamlessly blending aesthetics and functionality into a practical and visually striking piece.

dedim chair

DEDIM is characterized by a combination of different shapes with a triangular section, resulting in a comfortable armrest that is perfectly connected. Due to its unique construction, it is available in both two-tone and monochrome options.

dedim chair with canopy

The DEDIM chair with canopy immediately invites you to relax, transporting you to a holiday atmosphere even in everyday settings. The canopy adds an element of comfort and protection, transforming the chair into the perfect refuge for enjoying quiet moments in the outdoors, whether in the sun or during a break in the backyard. The combination of essential design and functionality makes it ideal for outdoor spaces like terraces, gardens, or balconies, and for indoor settings designed to evoke a sense of vacation and freedom. The DEDIM chair with canopy is also an excellent choice for both outdoor and indoor contract spaces, thanks to its originality, sturdiness, and distinctive design.

MONTE collection

angelettiruzza design

Outdoor elegance
and comfort in three
distinctive versions.

YAAZ

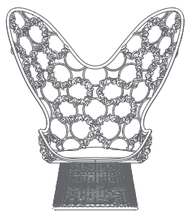

monte chair

The MONTE chair is stackable and offers three distinct backrest options. The simplest model is crafted entirely from aluminum, while the more luxurious version features soft cushions that wrap around the backrest, enhancing the outdoor atmosphere for leisurely, relaxed moments. The third version showcases a special rope weave, available in a variety of color options. The sophisticated metal armrest casting technique further emphasizes the brand's commitment to detail and its significant investment in research and development.

OPUS

angelettiruzza design

A butterfly beating its wings, a heart embracing, an organic weave of strings dancing.

opus bergère

With its enveloping and feminine shapes, OPUS is an outdoor armchair distinguished by its wide backrest, offering a light and graceful presence that blends perfectly into the natural context from which it draws its inspiration.
OPUS is an iconic element, capable of harmonizing with its surroundings, expressing elegance and naturalness in every detail. Its generous dimensions create a pleasant contrast with the light surface of the backrest, adorned with the fluid and sensual pattern of the weave.

KENDA collection

michael graves design

Wood, aluminum and rope: a combination of tradition and modernity.

kenda chair

The KENDA chair highlights enveloping shapes and is characterized by the combined use of wood, rope, and aluminum. This chair evokes refined handicraft techniques that evolve into a modern, practical, and functional object. The KENDA chair represents a perfect fusion of tradition and modernity, as well as technology and craftsmanship.

EDI collection

angelettiruzza design

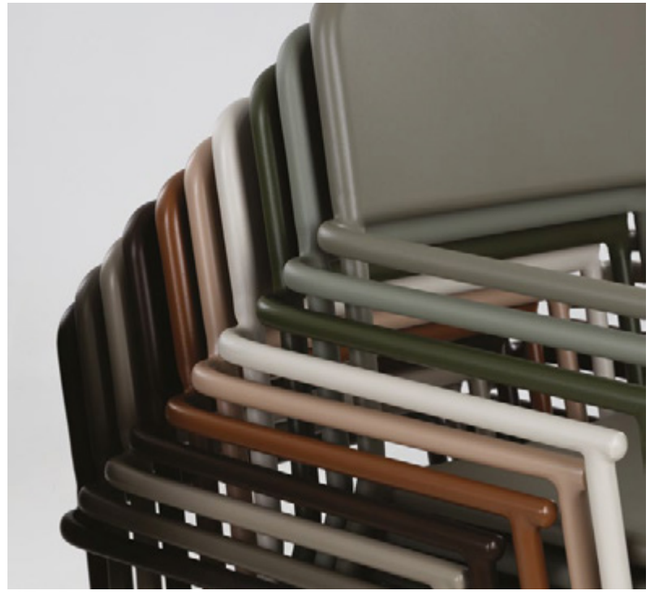

Comfortable and
lightweight,
perfect for both
indoor and
outdoor use.

edi chair

The EDI stackable chair is designed for practicality, easily stacking to maximize space when not in use. It can be crafted entirely from aluminum for a modern, minimalist look, or feature an original teak backrest that adds a warm, natural touch. This versatility makes the chair perfect for those seeking a balance between contemporary and traditional materials. Lightweight, comfortable, and weather-resistant, the EDI chair is a versatile piece that can furnish any indoor or outdoor space and is available in a wide range of colors.

edi bar & counter stool

Simplicity as an expression of quality: the EDI stool features a pure form, complemented by thoughtful details such as the stainless steel footrest cover. Available in two versions, the stool can be made entirely of aluminum or with a backrest in original teak. Two height options are available: counter and bar stools (H: 85 cm and H: 95 cm).

SAYE
angelettiruzza design

Lightness, stability, and exceptional functional performance define SAYE a timeless product that stands the test of time.

saye chair

SAYE is a contemporary reinterpretation of the classic folding director's chair. Comfortable, solid, and functional, its die-cast aluminum frame ensures exceptional outdoor performance, featuring lightweight construction, resistance to the elements, and remarkable sturdiness. The teak inserts on the armrests add comfort for extended use, while the fabric of the seat and backrest is fully removable for easy cleaning and replacement. YAAZ offers its original take on this iconic, space-saving product.

saye stool

The functionality of saving space is brilliantly addressed by the foldable design of the SAYE stool, making it easily transportable and storable. The die-cast aluminum structure features a cleverly designed opening and closing joint for the seat, ensuring remarkable lightness. Thanks to its lightweight and stable characteristics, SAYE is an ideal choice for furnishing any type of yacht.

SEMT collection

angelettiruzza design

Innovation, functionality, and beauty come together to enhance the experience of conviviality.

semt table

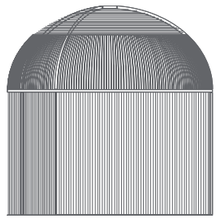

A modular design for an intelligent table, created to meet the needs of a world seeking sustainable and innovative solutions. The table's supporting structure is composed of a single die-cast aluminum module, providing stability, lightness, and a seamless, elegant form. By adding additional modules and extending the teak tops, the table can reach larger dimensions while ensuring easier storage, transport, and recycling.

FESS

angelettiruzza design

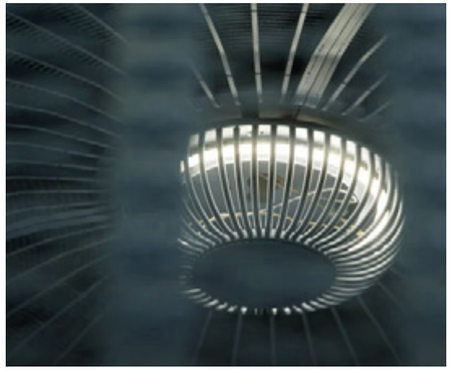

The heart of every outdoor space.

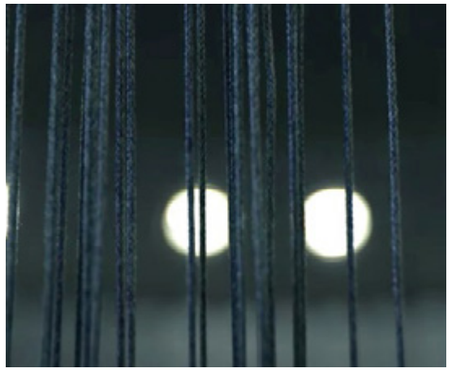

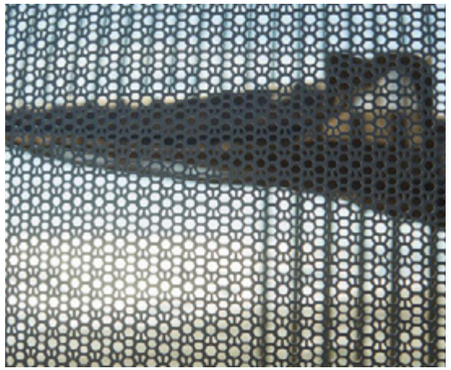

The FESS gazebo has a diameter and height of 3.5 meters. Its spacious and inviting interior features either a rope or teak floor and is fully customizable to suit the customer's preferences, allowing for the creation of a tailored environment for any need. The space can be furnished with tables and chairs, making it ideal for an intimate and exclusive outdoor dining area; armchairs and sofas to transform the gazebo into a cozy retreat for relaxation and socializing; or sun loungers to provide a shaded resting spot, making it a perfect wellness area as well.

fess gazebo

Inspired by the graceful form of the weeping willow, FESS reinterprets the traditional berceau—a richly decorated garden gazebo—offering a contemporary vision that retains the warmth and beauty of these historic spaces while embracing a modern, minimalist aesthetic. A distinctive feature of FESS is its dome, covered with woven ropes that cascade downward to create soothing shade, adding a unique textural and decorative effect. These ropes enhance the natural, inviting atmosphere, transforming the gazebo into an ideal retreat during the hottest hours of the day or a secluded corner for an intimate outdoor dinner. The structure is made of aluminum, fully disassemblable, and equipped with a central fixture for lighting.

complements

HAYAL

angelettiruzza design

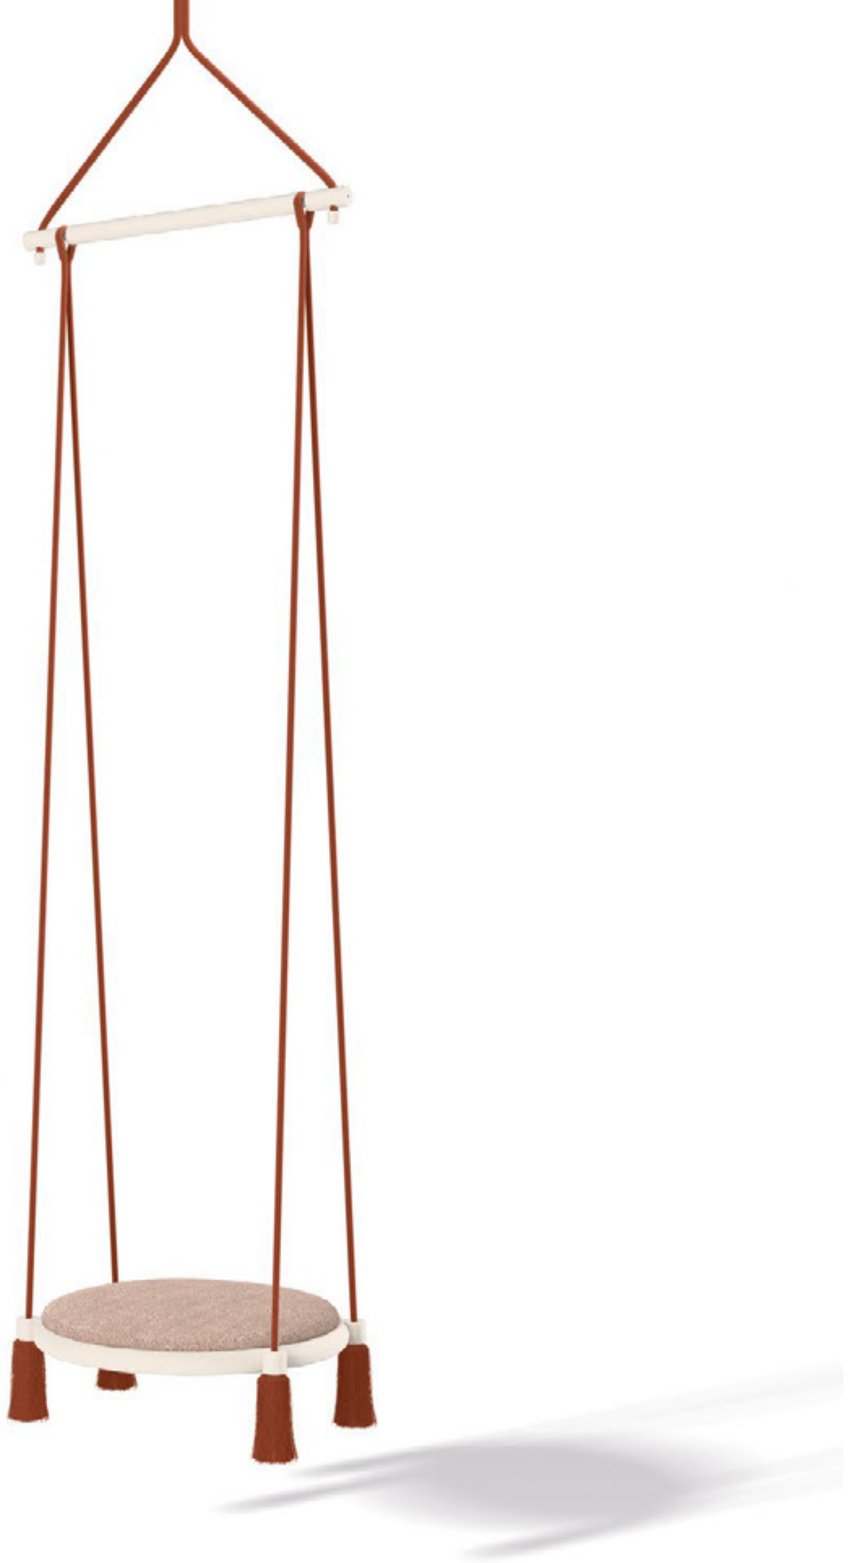

The encounter between Türkish tradition and Italian culture.

This poetic piece of furniture, reminiscent of childhood memories, was conceived as a place and a non-place—an enchanting object, much like a flying carpet, that invites one to drift into a dreamlike realm. A harmonious fusion of Turkish craftsmanship and Italian design, the HAYAL circular swings possess a strong visual presence while maintaining a minimalist form. The frame is crafted from aluminum, while the seat features a plush cushion, adorned with delicate tassels that enhance the charm of its suspended structure.

hayal swing

HAYAL is constructed from aluminum and synthetic rope specifically designed for outdoor use. This yarn, produced by the company, provides excellent protection against sunlight and weather, ensuring strength and durability over time. Complementing the design, Sunbrella fabrics made from acrylic outdoor fibers offer outstanding resistance to weather, UV rays, and mildew, maintaining vibrant colors and the material's integrity even in harsh conditions.

ORAK parasol

patrick norguet

Comfort in
contact with
nature.

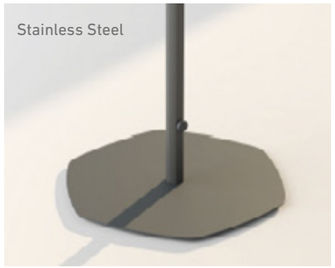

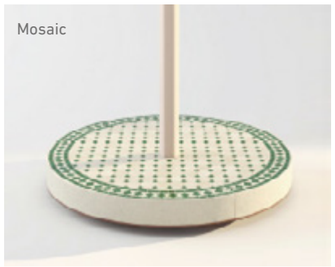

orak parasol

ORAK is a collection designed by Patrick Norguet that reinterprets the parasol as both a functional and aesthetic design object. The design aims to meet the basic needs of outdoor use while offering a harmonious and balanced pre-sence within the space.
Thanks to its parabolic form, it integrates into its surroundings; it complements the character of the space without drawing attention.

Designed with 3 types leg options,
ORAK reflects the collaboration of functionality and harmony in any space.

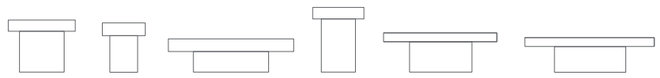

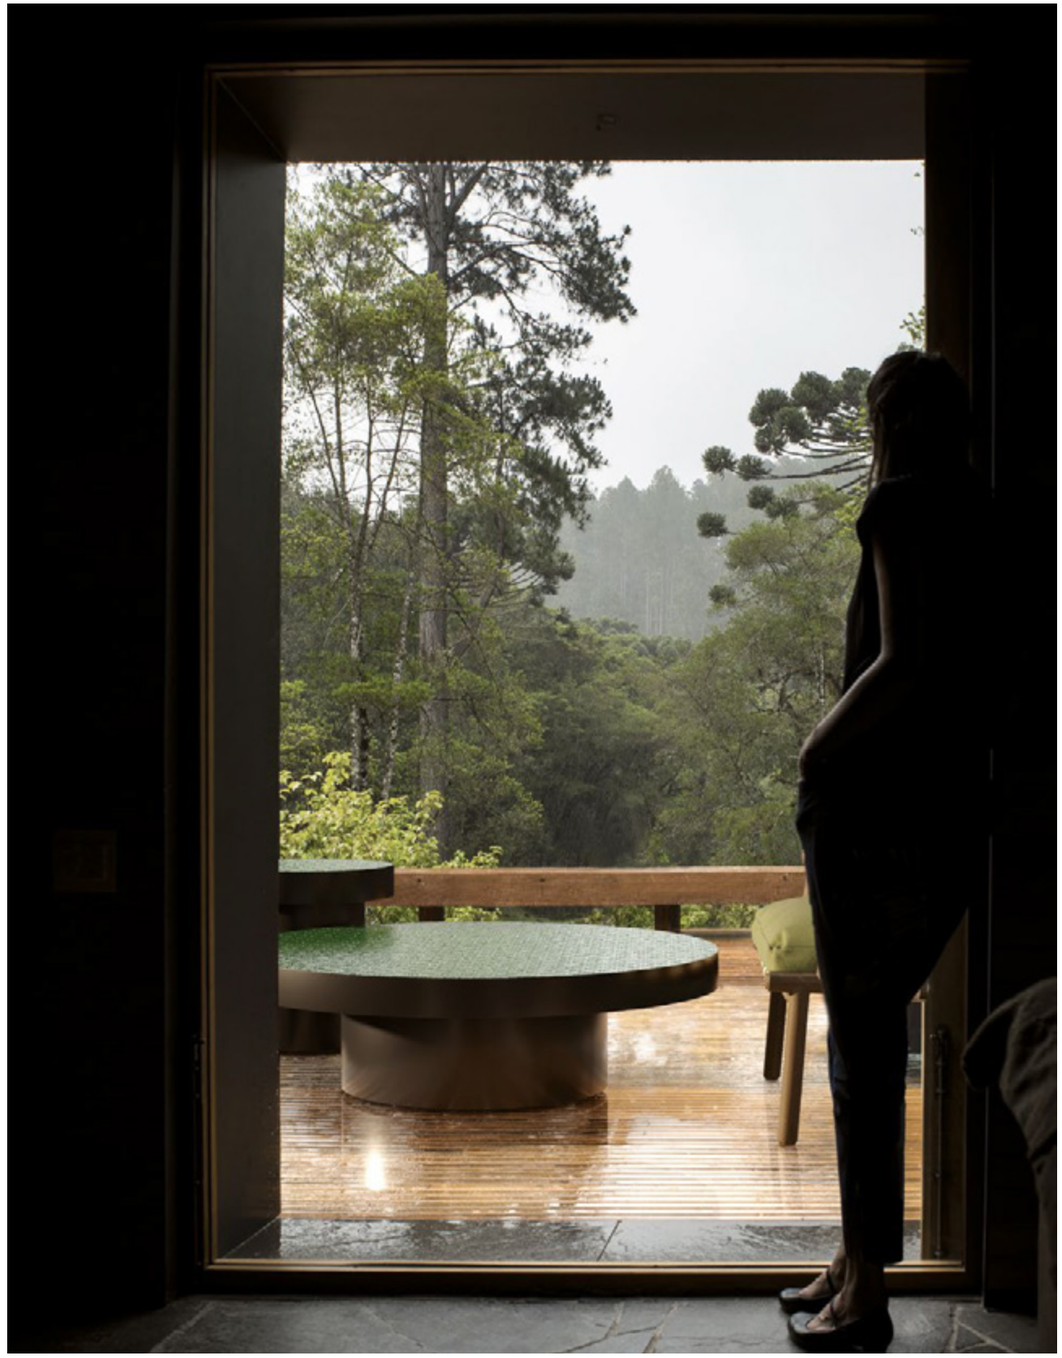

"The elegance of a product lies in the quality of its details. At ORAK, we designed a family of parasols that not only fulfill their basic function but also enrich outdoor spaces. The parabolic form, which doesn't intrude on the space, achieves a balanced appearance thanks to the attention to detail. The color and material choices were designed to offer a wide range of harmonious combinations to suit different spaces," explains Patrick Norguet.

HISS
angelettiruzza design

A vital contrast that creates harmony.

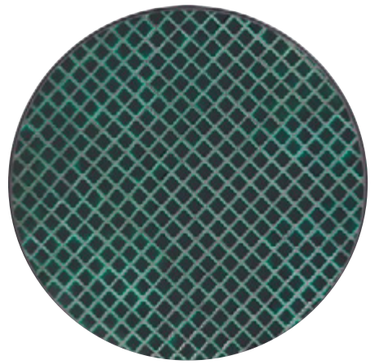

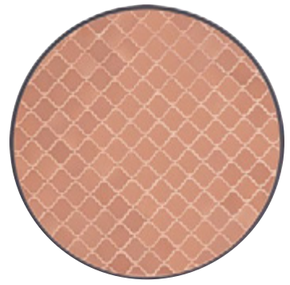

hiss coffee table

The clean lines of aluminum blend with the vibrant imperfection of handcrafted porcelain, creating a fascinating contrast between industrial material and traditional craftsmanship.

This coffee table collection is characterized by various dimensions, designed to enrich any lounge area, both indoors and outdoors. The combination of porcelain and aluminum colors allows for the creation of elegant and refined environments, seamlessly adapting to any space or style.

SINI

angelettiruzza design

The small, colorful flowers of the net meet the transparency of glass and the warmth of wood.

Also ideal for contract use, the SINI coffee table is available in three different sizes: Ø45 cm / 17.7", Ø75 cm / 29.5", and Ø100 cm / 39.4". The structure of the coffee table is made of natural teak wood, and the table top features a colored wire mesh, designed by our art directors, placed between two pieces of glass.

HARR

YAAZ Lab

The warmth
and ambiance
of an open fire.

harr fire pit

HARR is a garden fireplace with a dome, crafted from stainless steel. The cover can be made from either stainless steel or decorative high-pressure laminate (HPL). Its circular shape enhances the primal charm of fire, providing warmth for both the body and the soul.

and coffee table

A top made of either Ment or Z-Pact is also available, transforming the brazier into a comfortable tabletop.

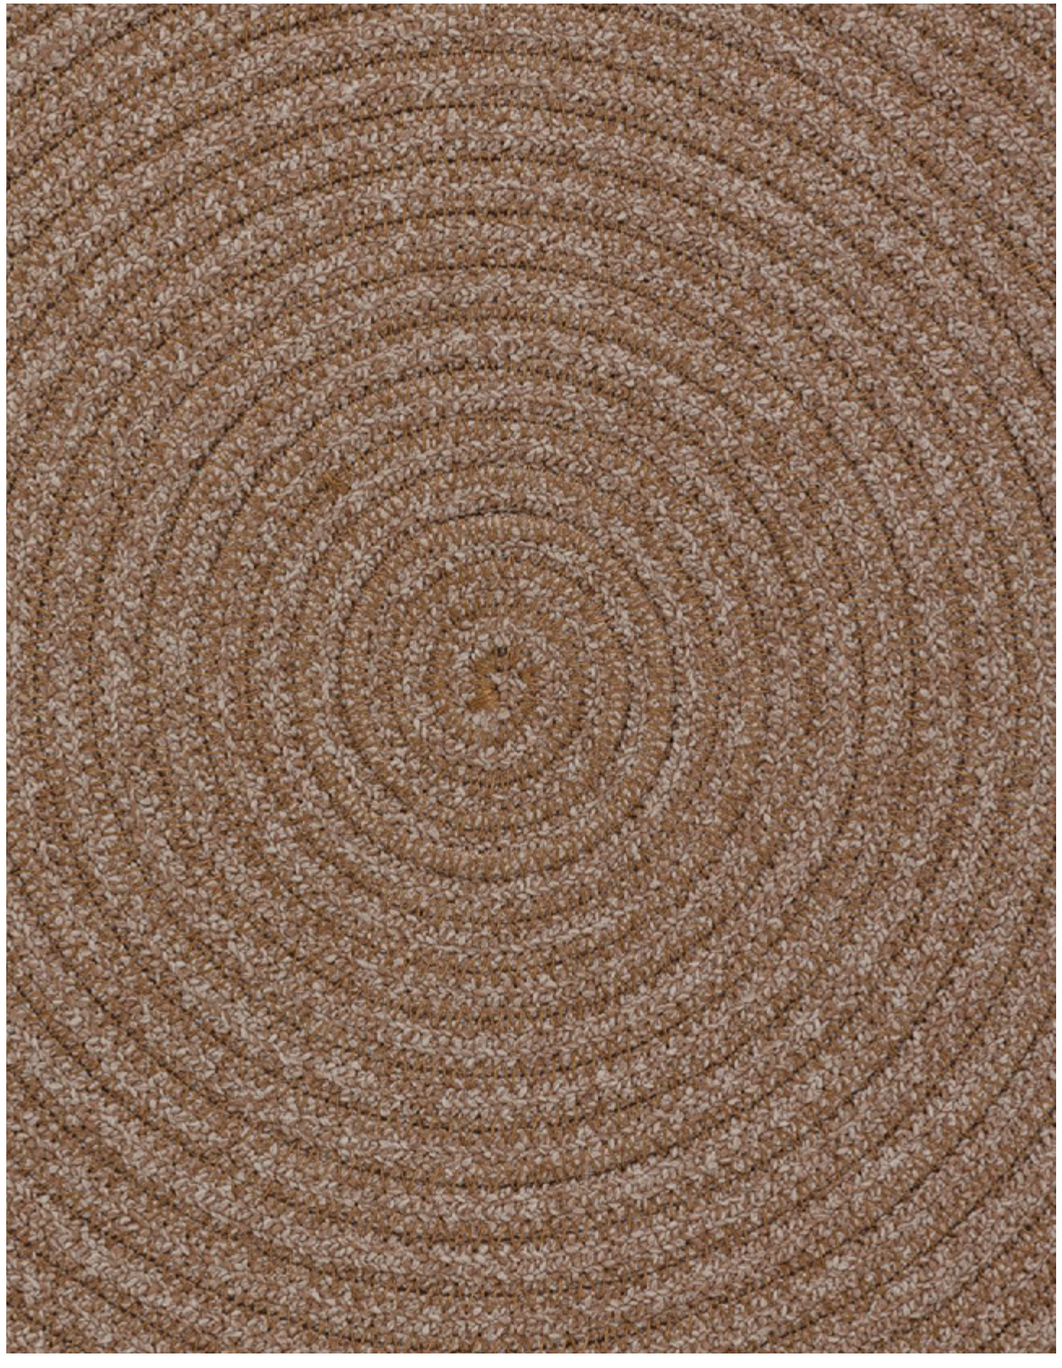

YUNN

angelettiruzza design

Outdoor carpets, bringing elegance everywhere.

YAAZ Rope, which forms the structure of YUNN carpets, is a sustainably produced material that does not require water in its production. It is available in six different sizes and five different models, providing thermal insulation due to its low heat transfer. Additionally, its low coefficient of friction makes the carpet resistant to abrasion. With its hydrophobic structure, it absorbs minimal water and is resistant to moisture. Its high antibacterial properties help prevent the formation of unpleasant odors. It does not cause skin irritation or allergies, making YUNN both a safe and comfortable option.

KUVA

angelettiruzza design

The material expressiveness of natural and coloured terracotta.

The pure shape of the vases, available in four different colors and three sizes, enhances the sensory and tactile qualities of terracotta, an ancient material with timeless appeal. Please refer to the technical pages for more details.

sweet cushion/blanket

SWEET is available in a variety of colors and materials. The cushion is made from five Sunbrella fabrics in the catalog, with each outer color matched to a particular shade of the blanket. One of the six versions features printed fabric with the Sweet design on the outside, perfect for those seeking an accessory with a unique character. SWEET furnishing accessories are more than just a cushion and blanket combined; they represent a fantasy world where female creatures live in harmony with nature, free from separation, celebrating a fluid and balanced understanding.

Seeking beauty in simplicity.

Quality is important in every environment, but in outdoor spaces, it becomes a fundamental reason for standing out in the market. This is why we use the best raw materials, as we believe it is both an ethical and sustainable choice. From this foundation, we have begun to build, selecting carefully calibrated finishes and color shades that focus on beauty—on the feelings of serenity that define a design approach in search of harmony. We draw inspiration from the colors of nature, which relax and nurture the need for silence and light, serving as an endless source of wellness and rootedness.

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.
In YAAZ aluminium products, 7001 series aluminium, which is especially preferred in the defence industry, is used. With its high hardness ratio, it is extremely resistant to all weather conditions (-50 / +50) and the effects of sand, dust and sea salt. As with other metals, aluminium can heat up or cool down depending on weather conditions, so it is recommended to use with a cushion for comfort.
Standard Composition: EN 573-3
Standard Properties: EN 755-2

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

Cleaning and Handling Instructions
Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.
For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.
Failure to comply with the recommended cleaning schedule will nullify anywarranties.
Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.
Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.
If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.
Renovation can be required in the case of heavy soiling (due to lack of maintenance).
In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters beused.

a warm colour life

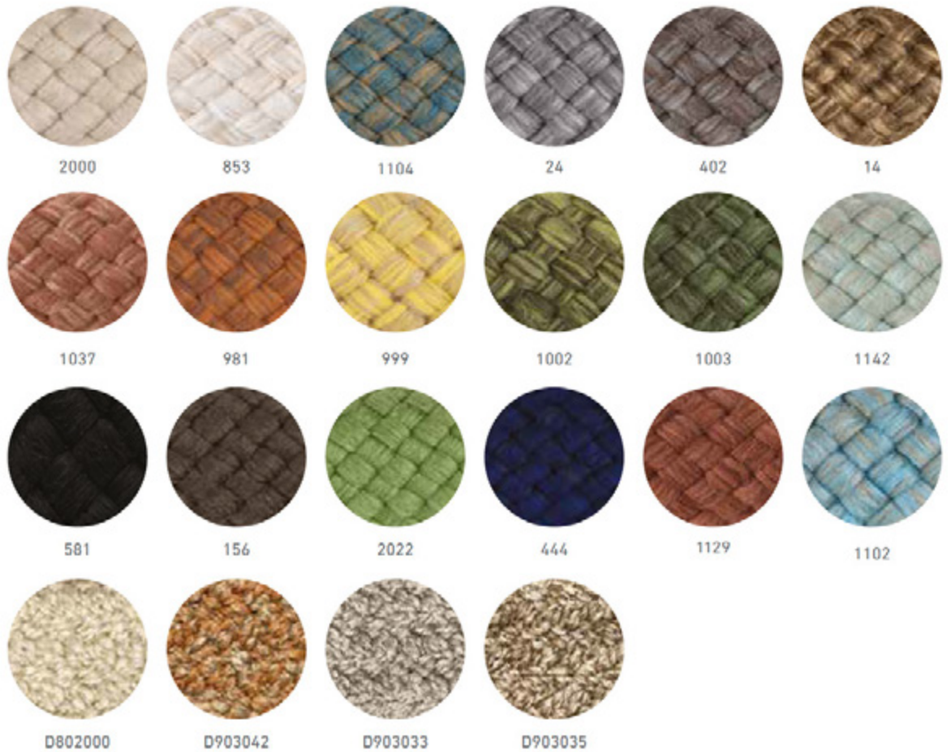

YAAZ Rope

We have created a vibrant collection using our YAAZ ROPES.
YAAZ ropes are produced from raw materials with OEKO-TEX, SGS and UKAS International quality certificates, with proven strength, high resistance to all weather conditions and UV colour fastness.
Our design team has carefully selected and produced a colour palette that can be easily combined with our aluminium frame colours.
• Outdoor furniture ropes made of durable acrylic-based raw materials provide superior protection against the sun's harmful rays and harsh weather conditions
• The UV resistance and color fastness of the used products are regularly tested in accordance with ISO 105-B04 standards.
• With a wide range of colors, outdoor furniture threads perfectly cater to your design needs.

Cleaning and Using Instructions
Dust the rope furniture regularly with a soft cloth or soft sponge to remove light dirt or debris. For deeper cleaning, gently clean the rope with a solution of white soap and warm water using a soft sponge. Then rinse thoroughly with clean water. Harsh chemicals can damage the rope and cause discolouration. Do not use. After cleaning, allow the furniture to dry completely before using it again.

Avoid placing heavy objects on the furniture and do not put weight on the drawstring parts of the furniture to avoid rope sagging. Avoid dragging or scraping the furniture on hard surfaces as this may damage the rope and frame. Avoid using the furniture in weather conditions such as heavy rain or high winds as this will prolong its life. To prolong the service life of the furniture, store it under protective YAAZ cover when not in use.

The rope codes **D80200, D903042, D903033** and **D903035** are available only for YUNN carpets and the DENK collection

sweetly joyful

Teak

Teak wood is particularly well suited for outdoor use due to its durability, robustness and strength. The natural teak blocks we import from Mynmar are processed in our factory for all stages until they become products.

Cleaning and Using Instructions
General:
Moisture, wind and heat can cause small cracks in the teak material, causing it to collapse. These should be considered the natural behaviour of a "living" material. Their appearance and duration depends on the humidity level in the air. Cracks that can occur when the wood dries quickly tend to close when the humidity level increases. Dark spots or streaks are caused by the moisture contained in the wood. The appearance of teak wood will tend to even out during the first few weeks outdoors. Continuous exposure to atmospheric conditions causes superficial oxidation (1-2 mm) of the wood, which manifests itself in the characteristic silver-grey colour. This does not affect the underlying structure and does not change its resistance to external factors. In the first weeks of outdoor use and with the first rains, the wood may release red pigment due to its natural characteristics or micro-residues from processing; in such a case it is recommended to wash the floor immediately with products suitable for the surface. In very humid conditions, teak wood may release a reddish-coloured oil and stains may appear on the surface. These stains can be treated as follows: For normal cleaning of the wood, use a soft cloth (not microfibre), water and a non-chemical cleaning agent. In case of deep and difficult to remove stains, it is recommended to sand the surface evenly and polish it with a special product for the restoration of outdoor wooden furniture. This type of restoration product should not be used more than once a year. To prevent oxidation of the product surface, it is recommended to apply a nourishing and protective oil to the surface. To remove the grey patina caused by oxidation and restore the original colour of the teak, use a special product for the restoration of outdoor wooden furniture every 2/3 years. After this process, wash the product with a non-chemical detergent and after drying, apply an impregnating agent specially made for outdoor wood. Do not use wire brushes, abrasive products, bleach, acids and aggressive chemical solvents. Do not use pressure cleaners at close range or at high temperatures.

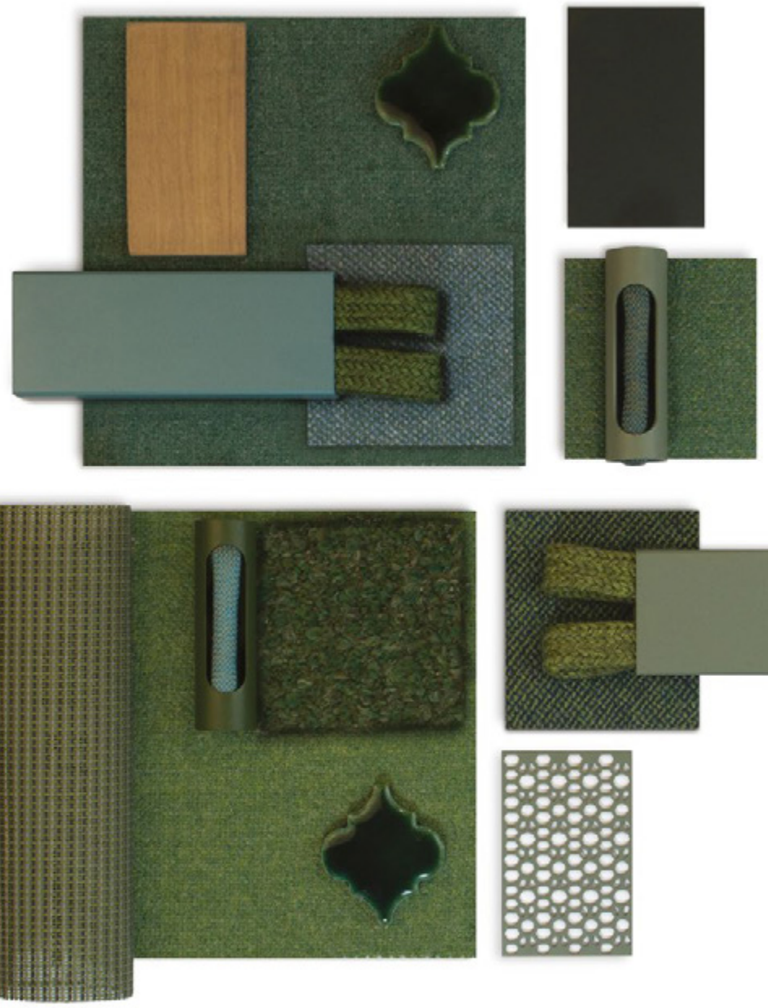

1. For regular cleaning, wipe teak furniture with a soft cloth or sponge and a mild detergent solution.
2. To remove stubborn stains or accumulated dirt, use a teak cleaner or a mixture of vinegar and water. Apply the solution to the furniture with a soft-bristled brush, then rinse thoroughly with clean water.
3. Allow the furniture to dry completely before reuse.
4. To preserve the natural colour of teak wood, apply teak preservative or teak oil once or twice a year. This will help protect the wood from the elements and prevent it from turning grey.

Using the guidelines:
1. Do not place hot objects directly on teak furniture as this can cause heat marks or discolouration.
2. Avoid placing heavy objects on the furniture as this can cause it to warp or crack over time.
3. Do not drag furniture over rough or uneven surfaces as this can scratch or damage the wood.
4. If possible, store the furniture indoors or under the YAAZ protective cover when not in use to prolong its useful life.

Ment

High-strength terrazzo plates produced with the highest quality natural stones.
A first-class appearance is obtained with homogeneous color and aggregate distribution on large surfaces.
Ment plates provide wide possibilities for different designs in spaces with the resistance to color fading and unlimited color and a wide variety of dimensions, especially for outdoor use.
In terms of sustainability, the water used in Ment production is recycled and recycled again. Precast is made of natural aggregates.
It provides heat and energy saving with its long-term thermal heat retention and slow release feature in the areas where it is used.
In Yaaz Ment products, epoxy synthetic resin is used as “binder” instead of cement. Therefore, it is not easily stained in daily use.

Cleaning and Using Instructions
For daily cleaning, simply wiping with a clean, damp cloth is sufficient to keep dirt and grit off the surface.
When not cleaned regularly, sand and soil residues that can accumulate on outdoor ment products act as abrasives and damage the surface.
Use only neutral liquid cleaners (meaning neither acid nor alkaline ones). For best results, use a commercial cleaner made specifically for terrazzo. All-purpose household cleaners, soaps, detergents and wax cleaners usually contain one or more alkali and therefore should not be used on ment.

Perforated Sheet

Our perforated sheets made of aluminium are shaped by CNC machines in our factory with patterns specially designed for YAAZ.

Cleaning and Handling Instructions
For regular cleaning, wipe aluminium furniture with a soft cloth or sponge and a mild detergent solution. Avoid using steel wool or abrasive cleaners as they may scratch the aluminium surface. Rinse the furniture thoroughly with clean water and dry with a clean, dry cloth. To avoid damages such as dents and scratches on the surface of the product, use aluminium polish.

Zero - HPL

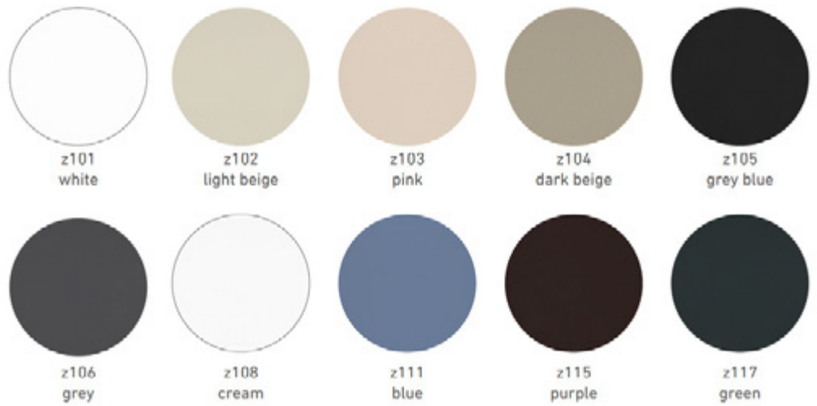

Superior features of ZERO PST surface technology;

- Does not leave fingerprints.
- Ultra matt surface is soft touch.
- Light reflection is very low thanks to its ultra colour intensity.
- Easy to clean.
- Resistant to household and laboratory chemicals.
- Provides safe food contact due to its anti-bacterial properties.
- It has high heat resistance with temperature / cold resistance.
- It is long-lasting thanks to its micro-scratch, impact and abrasion resistance, thermal improvement repair, flame retardant and water repellent properties.
- Reinforced with pine organic polymer (lignin), ZERO-HPL has an elegant appearance and is extremely hard.

Due to all these superior properties, it is especially ideal for outdoor applications.
Lignin: A complex organic polymer that accumulates in the cell walls of many plants, making them tough and woody.

Cleaning and Using Instructions
Cleaning Agents that should not be used: Abrasive scrubbing liquid, Abrasive scrubbing solid, Stealwool, Abrasive sponge, cleaning agents with low acidic value, cleaning agents with high alkali value.
As the surface of Z-Pact acquire low light reflectivity, the use of any cleaning materials that contain abrasivesubstances and/or cleaning agents that contain low acidic value or high alkali value, might damage the surfacepermanently.

1. Clean the surface of the product with a suitable cleaning liquid, which must be poured onto a damp, non-abrasive cloth.
2. Wait 5 minutes after cleaning (the cleaning fluid should not remain on the surface of the panels for more than 30 minutes).
3. Then wipe the surface with a clean cloth and make sure that no residue of cleaning liquid remains on the surface.
4. YAAZ will not accept liability for possible damage caused by improper use of the cleaning fluid or the cleaning procedure.
5. The instructions for use of the cleaning materials used are the responsibility of the user.

colors and fragances of nature

Band

The straps we use in the UZ collection are specially designed with YAAZ ROPE raw material and production method. The colours chosen are determined by colour engineers to match the wood and fabric collections.

The straps we use in the Monte collection are flexible straps produced by Sunbrella and are under the assurance of Sunbrella. The selected colours were determined by colour engineers to match the wood and fabric collections.

Cleaning and Using Instructions
Dust the rope furniture regularly with a soft cloth or soft sponge to remove light dirt or debris. For deeper cleaning, gently clean the rope with a solution of white soap and warm water using a soft sponge. Then rinse thoroughly with clean water. Harsh chemicals can damage the rope and cause discolouration. Do not use. After cleaning, allow the furniture to dry completely before using it again.

Avoid placing heavy objects on the furniture and do not put weight on the drawstring parts of the furniture to avoid rope sagging. Avoid dragging or scraping the furniture on hard surfaces as this may damage the rope and frame. Avoid using the furniture in weather conditions such as heavy rain or high winds as this will prolong its life. To prolong the service life of the furniture, store it under protective YAAZ cover when not in use.

sky and see

Porcelain

Porcelain, which is among the ceramic types, gains superiority as the most valuable product of your space thanks to its durability, special compactness and resistance to external factors.

Its integrity with the glaze shows resistance to staining. This material is extremely resistant to chemical-atmospheric substances, and since it is baked at high temperature, it is extremely resistant to frost and temperature with its water repellent feature. It is a long-lasting outdoor material in terms of high resistance to abrasion and staining.

Cleaning and Using Instructions
Since it is a water repellent material, it will not be subject to any staining. It is sufficient to wipe any liquid spilled on the surface with a clean and soft cloth.

Since porcelain products are completely handmade, the slight crack appearance that will occur over time is natural and is not considered a defect.

Natural Ceramic

Opaque and with a tactile quality, this surface has a slightly burnished look that makes it soft and inviting. Particular care in the selection of high quality raw materials creates a surface with delicate coloured effects and with the extraordinary illusion of depth.

POWERFUL ACTION
Eliminates microbes and prevents their reproduction
24 Hours a day,with and without sunlight always active protection
Thanks to the technology permanently integrated into the product eternal effectiveness
Thanks to the reinforcing fibreglass mesh Extraordinary added resistance
Highly eco-friendly
Less raw materials used, lower water and energy consumption and lower CO2 emissions

Cleaning and Using Instructions
Use warm water and a high quality microfibre cloth. If needed, use warm water and a very diluted neutral detergent (one cap in 5 litres of water) or warm water and a universal degreaser (4-5 sprays in 5 litres of water). When finished, always rinse with water and a clean microfibre cloth.

fabrics

- Bleach cleanable
- Breathable comfort
- Mold / mildew resistant
- Water & stain resistant
- Sun protection
- UV / fade resistant

Sunbrella Fabrics

Outdoor fabrics made of acrylic fibre are strong. They are more resistant to both weather conditions and handling faults such as mould, scuffing and tearing. This is especially important for outdoor upholstery in active residential and commercial applications. Before weaving, the acrylic fabric yarns are solution dyed. This allows the fabric to retain its colour longer, even when exposed to direct sunlight. In addition to water repellency, acrylic fabrics are more breathable than other options, allowing the fabric to stay cooler in hot weather.
Sunbrella acrylic fabrics are considered premium for outdoor textiles.
Especially in terms of UV protection, Sunbrella is long-lasting compared to its counterparts and therefore offers long-term savings.

Traditional dyeing processes only leave color on the surface of fiber, so they easily fade. Sunbrella fibers are saturated to the core with highly UV-stable pigments, making Sunbrella fabrics resistant to fading and the degrading effects of sunlight.

All Sunbrella fabrics are engineered to resist mold and mildew. Should exposure to dirt and debris cause mold and mildew to occur, all Sunbrella fabrics can be easily and safely cleaned with bleach.

Cleaning and Using Instructions
**Please observe the washing instructions label inside the cushion.

To facilitate the daily care of your Sunbrella fabric:
Remove loose dirt with a sponge.
Spray with a cleaning solution of water and mild soap.
Allow the cleaning solution to penetrate the fabric.
Rinse thoroughly until all soap residue is removed and air dry.
Do not use bleach or softeners, as these can damage the fabric and affect its water-resistant properties.
If the fabric gets wet, allow it to dry completely before use to prevent mould growth.
You can machine wash the fabric in cold water on a gentle cycle using a mild detergent.
If ironing is necessary, use a low heat setting and a press cloth to avoid direct contact with the fabric.
Protect furniture with the fabric from inclement weather such as rain, snow and extreme temperatures by storing it under YAAZ covers.

Marine Leather

Marine Leather is a material often used in YAAZ's luxurious and durable furniture designs. Marine Leather stands out with its durable structure, while at the same time offering a comfortable use with its soft texture.

Cleaning and Using Instructions
Mix warm water and mild soap or a specialized cleaner for marine leather surfaces.
To remove stains, use a specially formulated leather cleaner or a lightly dampened cloth.
Moisturize your leather products regularly and care for them with a protective leather cream or polish to maintain the suppleness and shine of the leather.
Avoid exposing the furniture to extreme temperatures, such as direct sunlight or freezing temperatures.
Do not use abrasive materials or harsh chemicals when cleaning the furniture, as they can damage the marine leather.
To prevent scratches or tears, avoid dragging heavy objects across the surface of the furniture.
Consider covering the furniture during prolonged periods of non-use, such as during the winter months or when you are away on vacation.
Regularly inspect the furniture for any signs of damage or wear, and address any issues promptly to prevent further damage.
