YAAZ

COLLECTION: TURTLE
PRODUCT: S BAR STOOL (Code: Turtle.15)

BY YAAZ LAB | 2021

Product Specifications

Width	55 cm / 21.75'' in
Depth	57 cm / 22.50'' in
Height	100 cm / 39.50'' in
Weight	9 kg / 19,8 lbs
Primary Materials	Aluminium, Sunbrella / Yapa Fabrics

Product Overview

Defined by fluid curves and architectural minimalism, the Turtle S Bar Stool brings contemporary elegance to modern bar and lounge settings. Designed by YAAZ Lab as a signature piece of the Turtle Collection, it is engineered with a high-grade, powder-coated aluminum frame that balances lightweight handling with robust outdoor endurance.

The softly curved backrest embraces the circular seat cushion, offering optimal ergonomic support and enduring comfort. Enhancing the design's versatility, the Turtle Collection also offers an artisanal variation featuring an intricately woven acrylic rope backrest—allowing seamless styling across refined residential terraces and prestigious hospitality venues.

Engineered for longevity in high-use environments, the lower front footrest is fitted with a flush stainless steel kickplate, protecting the aluminyum frame from everyday wear and scuffs.

Sunbrella® Fabrics

Outdoor fabrics made from acrylic fibers are strong; they are more resistant to both weather conditions and usage errors such as mold, friction, and tearing. Before weaving, acrylic fabric threads are dyed with the solution. This allows the fabric to retain its color longer, even when exposed to direct sunlight. Sunbrella acrylic fabrics are considered premium for outdoor textiles, providing long-term savings and exceptional UV protection.

Cleaning & Care Instructions

Brush off any loose dirt or debris from the surface using a soft-bristled brush.
Apply a solution of water and mild soap with a sponge or soft cloth.
Gently scrub in a circular motion; do not rub too hard.
Rinse thoroughly with clean water, ensuring all soap residue is removed.
Allow to air dry completely before use.
Machine wash in cold water using a mild detergent on a gentle cycle.
Do not use bleach or fabric softeners.
Protect from harsh weather by covering with YAAZ covers or storing indoors.

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

Cleaning and Using Instructions
Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.
For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.
Failure to comply with the recommended cleaning schedule will nullify anywarranties.
Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.
Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.
If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.
Renovation can be required in the case of heavy soiling (due to lack of maintenance).
In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters beused.

Aluminium COLOR OPTIONS

YAAZ aluminum products are manufactured from 7000 series aluminum alloy, and their surfaces are coated with Jotun-brand antistatic powder coating.
