YAAZ

COLLECTION: OPUS
PRODUCT: BERGÈRE (Code: Opus.12)

BY ANGELETTIRUZZA DESIGN | 2025

Product Specifications

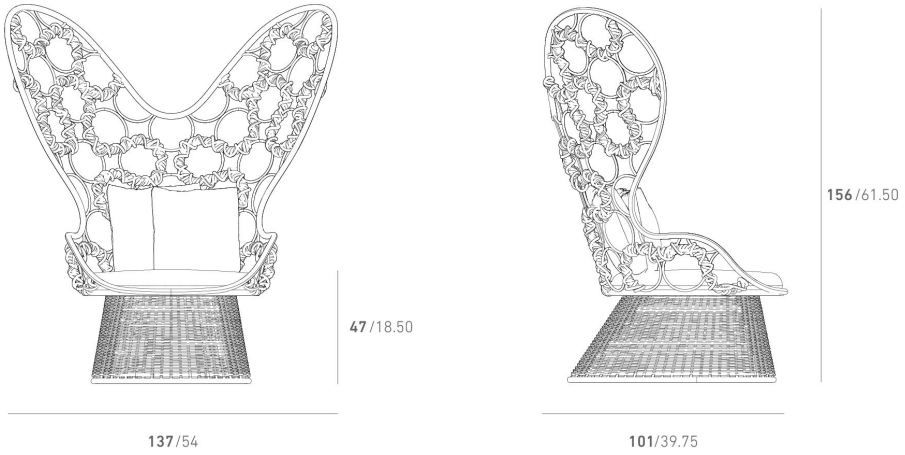

Width	137 cm / 54'' in
Depth	101 cm / 39.75'' in
Height	156 cm / 61.50'' in
Weight	35,4 kg / 78 lbs
Primary Materials	Aluminium, Sunbrella / Yapa Fabrics, Rope

Product Overview

Poetic in form and sculptural in presence, the Opus Bergère elevates outdoor living into an artistic statement.

Conceived by the renowned Italian studio Angelettiruzza Design, Opus draws its striking silhouette from the ethereal contour of butterfly wings, striking a delicate balance between organic softness and architectural rigor. Every detail highlights exceptional artisanal craftsmanship. The backrest's curved aluminum framework is detailed with an intricate, entirely hand-wrapped rope motif, giving each chair a distinct, handcrafted identity.

Beneath, a sculptural conical base—built on a solid aluminum frame and handwoven with weather-resistant acrylic cord—grounds the chair with rich tactile warmth and stability. Engineered for luxurious outdoor environments, the Opus Bergère offers complete creative freedom with an expansive palette of 20 powder-coated aluminum colors and 20 premium outdoor rope shades, allowing for a bespoke presence beside the pool, on the terrace, or in an open-air lounge.

Sunbrella® Fabrics

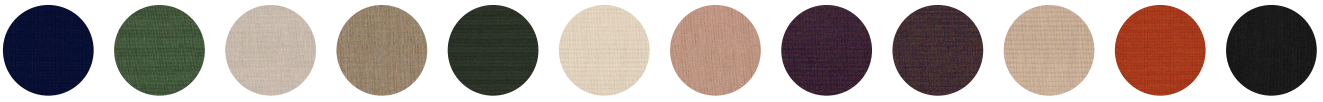

Outdoor fabrics made from acrylic fibers are strong; they are more resistant to both weather conditions and usage errors such as mold, friction, and tearing. Before weaving, acrylic fabric threads are dyed with the solution. This allows the fabric to retain its color longer, even when exposed to direct sunlight. Sunbrella acrylic fabrics are considered premium for outdoor textiles, providing long-term savings and exceptional UV protection.

Cleaning & Care Instructions

Brush off any loose dirt or debris from the surface using a soft-bristled brush.
Apply a solution of water and mild soap with a sponge or soft cloth.
Gently scrub in a circular motion; do not rub too hard.
Rinse thoroughly with clean water, ensuring all soap residue is removed.
Allow to air dry completely before use.
Machine wash in cold water using a mild detergent on a gentle cycle.
Do not use bleach or fabric softeners.
Protect from harsh weather by covering with YAAZ covers or storing indoors.

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

Cleaning and Using Instructions
Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.
For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.
Failure to comply with the recommended cleaning schedule will nullify anywarranties.
Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.
Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.
If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.
Renovation can be required in the case of heavy soiling (due to lack of maintenance).
In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters beused.

Aluminium COLOR OPTIONS

YAAZ aluminum products are manufactured from 7000 series aluminum alloy, and their surfaces are coated with Jotun-brand antistatic powder coating.

YAAZ Ropes

YAAZ's synthetic outdoor rope and band collection combines durability, performance and refined design. Developed with specialized additives and pigments, the yarns offer high resistance to UV exposure and varying weather conditions, along with excellent colourfastness and strength.
A carefully curated colour palette complements YAAZ's aluminium frame finishes, offering versatile combinations and a cohesive design approach. Designed for outdoor environments, the collection brings a distinctive aesthetic to contemporary outdoor furniture.

Cleaning and Using Instructions

Regularly dust the rope with a soft cloth or soft-bristled brush to remove loose dirt and debris.
Clean with mild soap and warm water, gently scrubbing with a soft-bristled brush.
Rinse thoroughly with clean water and allow to dry completely before use.
Avoid harsh chemicals and abrasive cleaners to prevent damage and discoloration.
Do not exceed the manufacturer's specified weight capacity.
Avoid dragging or scraping the furniture on hard surfaces to prevent damage to the rope and frame.
Avoid exposure to extreme weather conditions, such as heavy rain and high winds.
When not in use, store indoors or protect with a YAAZ cover to extend the furniture's lifespan.
