YAAZ

COLLECTION: HUMA
PRODUCT: SUNBED (Code: Huma.17)

BY YAAZ LAB | 2025

Product Specifications

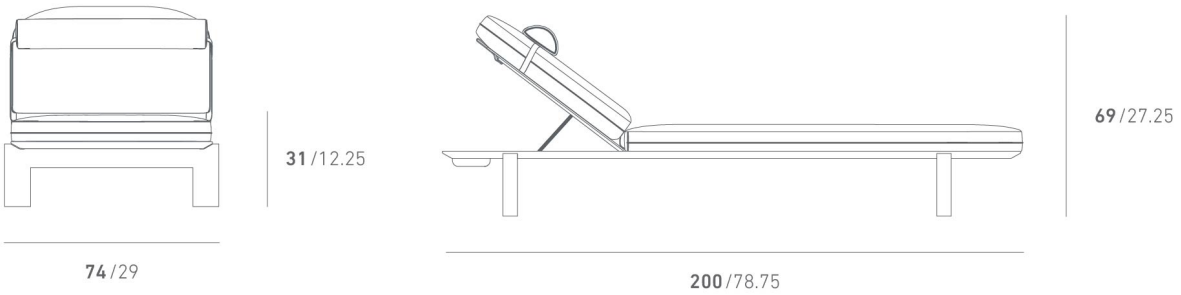

Width	74 cm / 29'' in
Depth	200 cm / 78.75'' in
Height	69 cm / 27.25'' in
Weight	59,6 kg / 131,4lbs
Primary Materials	Aluminium, Teak, Sunbrella / Yapa Fabrics, Headrest Strap (Genuine Leather)

Product Overview

Designed by YAAZ Lab, the Huma Sunbed combines architectural precision with the natural warmth of teak. Its lightweight, powder-coated aluminum frame, ergonomic cushion and solid teak legs create a refined balance of comfort and durability.

Featuring a 3-position reclining mechanism with a genuine leather pull handle and a matching leather-secured cylindrical headrest, it offers effortless adjustment for ultimate relaxation. An integrated rear tray with teak inlay provides a discreet space for personal essentials. Available in stationary and mobile versions with teak wheels, Huma brings effortless elegance to outdoor living.

For all sunbed models, only quick-drying foam (FQS) is used as the padding material.

Sunbrella® Fabrics

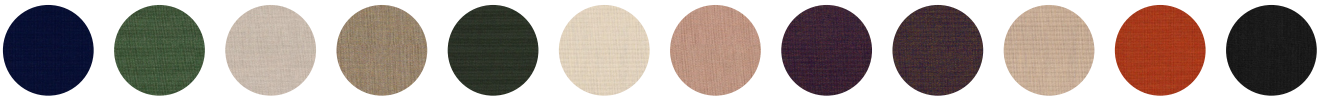

Outdoor fabrics made from acrylic fibers are strong; they are more resistant to both weather conditions and usage errors such as mold, friction, and tearing. Before weaving, acrylic fabric threads are dyed with the solution. This allows the fabric to retain its color longer, even when exposed to direct sunlight. Sunbrella acrylic fabrics are considered premium for outdoor textiles, providing long-term savings and exceptional UV protection.

Cleaning & Care Instructions

Brush off any loose dirt or debris from the surface using a soft-bristled brush.
Apply a solution of water and mild soap with a sponge or soft cloth.
Gently scrub in a circular motion; do not rub too hard.
Rinse thoroughly with clean water, ensuring all soap residue is removed.
Allow to air dry completely before use.
Machine wash in cold water using a mild detergent on a gentle cycle.
Do not use bleach or fabric softeners.
Protect from harsh weather by covering with YAAZ covers or storing indoors.

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

Cleaning and Using Instructions
Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.
For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.
Failure to comply with the recommended cleaning schedule will nullify anywarranties.
Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.
Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.
If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.
Renovation can be required in the case of heavy soiling (due to lack of maintenance).
In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters beused.

Aluminium COLOR OPTIONS

YAAZ aluminum products are manufactured from 7000 series aluminum alloy, and their surfaces are coated with Jotun-brand antistatic powder coating.

Teak

YAAZ oversees every stage of its teak furniture production, from carefully selecting sustainably sourced teak to crafting and finishing each piece. Using precision machinery and controlled kiln-drying processes, we ensure lasting quality and durability.

Teak is a natural, low-maintenance material designed to withstand outdoor conditions throughout the seasons. Over time, exposure to sunlight and rain naturally transforms its honey-gold color into a soft, silvery-grey patina, allowing the furniture to age beautifully and naturally.

Cleaning and Using Instructions
Teak naturally contains oils that help protect the wood. To maintain its surface, apply teak oil or a suitable water-based protector once or twice a year.
Avoid varnishes and similar chemical coatings.
Sand aged or worn surfaces using 150–180 grit sandpaper, then clean with teak cleaner and allow to dry.
Repeat the sanding and cleaning process.
Apply a water-based protective coating with a cloth, covering all surfaces, including hidden areas.
Allow the first coat to dry for 24 hours before applying the second coat.
The second coat becomes touch-dry after approximately 4 hours in a well-ventilated environment at an average temperature of 20°C.

Teak COLOR OPTIONS

natural teak

dark teak

white teak

Sustainable Sourcing: YAAZ uses no teak of forest origin, but only teak supplied from sustainable Myanmar (Burma) that strictly adhere to the rigorously controlled environment and certified criteria which include replanting trees after harvest.

Headrest Strap (Genuine Leather)

Genuine Leather is a material frequently used as an accessory in YAAZ designs.

Cleaning and Using Instructions
First, remove dust from the leather with a soft cloth. Using white soap or a leather cleaning solution, wipe the leather with a damp cloth. Apply gently in circular motions. After the cleaning process is complete, dry the leather with a dry cloth.
Use a specially formulated leather cleaner or a slightly damp cloth to remove stains.
Moisturize your leather products regularly and maintain them with a protective leather conditioner or polish to preserve the leather's suppleness and shine.
Avoid exposing the furniture to extreme temperatures such as direct sunlight or freezing temperatures.
Do not use abrasive materials or harsh chemicals when cleaning the furniture, as these can damage marine leather.
To prevent scratches or tears, avoid dragging heavy objects across the furniture's surface.
Consider covering the furniture when it is not in use for extended periods, such as during winter months or while on vacation.
Regularly inspect furniture for signs of damage or wear, and address any problems promptly to prevent further damage.
