YAAZ

COLLECTION: LEAF
PRODUCT: SIDE TABLE (Code: Leaf.32)

BY SEYHAN OZDEMIR SARPER - SEFER CAGLAR | 2026

Product Specifications

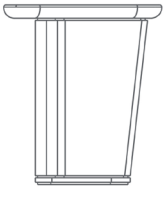

Width	60 cm / 23.50'' in
Depth	37,5 cm / 14.75'' in
Height	40 cm / 15.75'' in
Weight	13 kg / 28,7 lbs
Primary Materials	Aluminium, Natural Ceramic, Teak

Product Overview

Inspired by the organic lines of the Leaf collection, the Leaf Side Table adds a refined aesthetic to your living spaces with its architectural form and functional design.
Its durable aluminum body transitions fluidly through vertical lines into a sculptural base, while options for ceramic or teak tabletops offer material versatility.
Resistant to stains and outdoor elements, this piece fits effortlessly into both stylish indoor settings and open-air terraces, serving as a functional companion to sofas and sun loungers.

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

Cleaning and Using Instructions
Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.
For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.
Failure to comply with the recommended cleaning schedule will nullify anywarranties.
Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.
Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.
If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.
Renovation can be required in the case of heavy soiling (due to lack of maintenance).
In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters beused.

Aluminium COLOR OPTIONS

YAAZ aluminum products are manufactured from 7000 series aluminum alloy, and their surfaces are coated with Jotun-brand antistatic powder coating.

Natural Ceramic

Opaque and with a tactile quality, this surface has a slightly burnished look that makes it soft and inviting. Particular care in the selection of high quality raw materials creates a surface with delicate coloured effects and with the extraordinary illusion of depth.
POWERFUL ACTION
Eliminates microbes and prevents their reproduction
24 Hours a day,with and without sunlight always active protection
Thanks to the technology permanently integrated into the product eternal effectiveness
Thanks to the reinforcing fibreglass mesh Extraordinary added resistance
Highly eco-friendly
Less raw materials used, lower water and energy consumption and lower CO2 emissions

Cleaning and Using Instructions
Use warm water and a high quality microfibre cloth.
If needed, use warm water and a very diluted neutral detergent (one cap in 5 litres of water) or warm water and a universal degreaser (4-5 sprays in 5 litres of water).
When finished, always rinse with water and a clean microfibre cloth.

Natural Ceramic COLOR OPTIONS

corail blanc | cendre | amande | duna | ares

Teak

YAAZ oversees every stage of its teak furniture production, from carefully selecting sustainably sourced teak to crafting and finishing each piece. Using precision machinery and controlled kiln-drying processes, we ensure lasting quality and durability.

Teak is a natural, low-maintenance material designed to withstand outdoor conditions throughout the seasons. Over time, exposure to sunlight and rain naturally transforms its honey-gold color into a soft, silvery-grey patina, allowing the furniture to age beautifully and naturally.

Cleaning and Using Instructions
Teak naturally contains oils that help protect the wood. To maintain its surface, apply teak oil or a suitable water-based protector once or twice a year.
Avoid varnishes and similar chemical coatings.
Sand aged or worn surfaces using 150–180 grit sandpaper, then clean with teak cleaner and allow to dry.
Repeat the sanding and cleaning process.
Apply a water-based protective coating with a cloth, covering all surfaces, including hidden areas.
Allow the first coat to dry for 24 hours before applying the second coat.
The second coat becomes touch-dry after approximately 4 hours in a well-ventilated environment at an average temperature of 20°C.

Teak COLOR OPTIONS

natural teak

dark teak

white teak

> Sustainable Sourcing: YAAZ uses no teak of forest origin, but only teak supplied from sustainable Myanmar (Burma) that strictly adhere to the rigorously controlled environment and certified criteria which include replanting trees after harvest.
