

HARR COLLECTION FIRE PIT

by YAAZ Lab | 2021

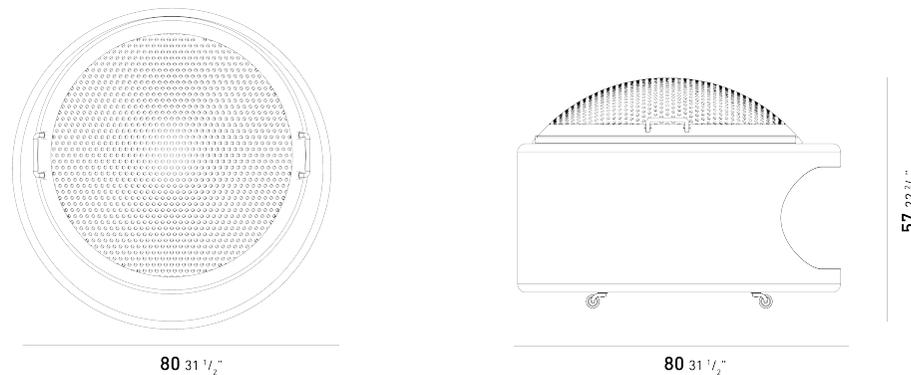

Item code: Harr.51
(Harr.51.s09.z10)

Collection

HARR is a garden fire pit with a dome, made of stainless steel. The grill cover can be made of pavement, stainless steel or Decorative High Pressure Laminate(HPL).

The circular shape enhances the atavistic charm of fire, and its sacredness, and offers protection and shelter.

Product Dimension

Weight 65,3 kg / 144 lbs

Product Details

STAINLESS STEEL Most Popular Metal

STAINLESS STEEL

Stainless steel is a light weight and strong metal with an excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Although stainless steel is the most popular material for outdoor furniture, despite being light weight, it is durable and can be easily processed into various complex shapes. While it is extremely weather-resistant on its own, it is recommended to be coated with polyester electrostatic powder for added protection against the elements and scratches, as well as to add color to the product. Since the electrostatic powder paint adheres better to the metal, it also makes the product much more resistant to fading. As with other metals, stainless steel can warm up or cool down depending on weather conditions, so it is recommended to use it with a cushion for comfort.

Cleaning and Using Instructions

For regular cleaning, wipe the stainless steel furniture with a soft cloth or sponge and a mild detergent solution.

To remove any stains or grime buildup, use a non-abrasive cleaner and a soft-bristled brush.

Avoid using steel wool or abrasive cleaners, as these can scratch the surface of the stainless steel.

Rinse the furniture thoroughly with clean water and wipe it dry with a clean, dry cloth.

For extra protection, apply a coat of car wax to the stainless steel surface. This will help to protect the furniture from the elements and keep it looking new.

Do not place heavy objects on the stainless steel furniture, as this can cause dents or damage to the surface.

Avoid dragging the furniture on rough or uneven surfaces, as this can scratch the stainless steel.

Do not expose the furniture to extreme weather conditions, such as heavy rain or extreme heat. If possible, store the furniture indoors or under a protective cover when not in use.

If the furniture becomes hot in direct sunlight, allow it to cool down before using it.

By following these cleaning and usage instructions, you can help ensure that your aluminum furniture stays in good condition for many years to come.

FIRE PIT

by YAAZ Lab | 2021

Z-PACT

Superior features of Z-Pact surface technology;

Non-finger printing surface

Soft-touch ultra-matte finish

Low light reflection due to ultra-color density

Easy to clean

Resistance to house hold and laboratory chemicals

Anti-bacterial properties for safe food contact

High heat resistance and temperature/cold resistance

Long-lasting durability thanks to micro-scratch, impact and abrasion resistance, thermal healing repair, flame retardant, and water repellent properties

Zero-HPL, which is reinforced with pine or ganic polymer(lignin), has a stylish appearance and is extremely hard.

Thanks to these superior properties, Zero-HPL is ideal for outdoor applications.

Lignin is a complex organic polymer that builds up in the cell walls of many plants, making them hard and woody.

Cleaning and Using Instructions

Simply using a damp cloth is enough to clean our compact products.

Cleaning materials with chemicals can cause the surface polish to wear off over time and reduce its protective effect.

Avoid exposing the furniture to extreme temperatures, such as direct sunlight or freezing temperatures.

Do not use abrasive materials or harsh chemicals when cleaning the furniture, as they can damage the compact surface.

To prevent scratches or chips, avoid dragging heavy objects across the surface of the furniture.

Consider covering with YAAZ cover, the furniture during prolonged periods of non-use, such as during the winter months or when you are away on vacation.

Regularly inspect the furniture for any signs of damage or wear, and address any issues promptly to prevent further damage.
